SEEK II to BAT Data Transfer

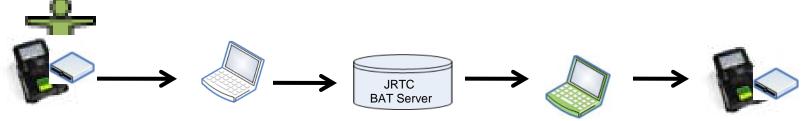

JRTC BAT & SEEK II Data Transfer

The JRTC DB Manager enrolls role players using SEEK; creates a CD of enrollments for import into BAT JRTC DB Manager creates initial BAT DB and burns CD of baseline DB for transfer to SEEK IIs

JRTC DB Manager uploads BAT DB and WL to JRTC FTP Site

**FSEs takes initial DB and WL and loads on each BAT in Field. Soldier loads WL onto each SEEK. Soldier Downloads DB and WL from FTP Site via connected BAT Laptop and burns WL to CD for import to SEEK Soldier imports new WL into SEEK using portable CD Drive

Soldier Enrolls/IDs roleplayer using SEEK II

Soldier exports new SEEK II enrollments to a CD

Soldier uses CD to import enrollments into BAT; then uploads all new records to the JRTC FTP Site.

Biometrics FSE or BAT DB Manager takes new enrollments and updates the JRTC BAT DB

JRTC BAT DB Manager reviews enrollments against scenario, creates Match report/ updates WL if needed, and loads updated WL and BAT DB to FTP site.
