

National Training Center 52ID DCGS-A Interoperability Handbook and Mission Command Validation Checklist

**Authored by
NTC DCGS-A Team:
FSE/Lead: Mr. Peter Achriem
FSE: Mr. James Bennett
DCGS-A Mentor: Mrs. Sara Hudson
DCGS-A Systems Integrators: Mr. Carlos Martinez
and Mr. James Mitchell
Approved and Validated
by MAJ William Turner, NTC G2 Operations**

UNCLASSIFIED//FOUO

1. FOREWARD

The purpose of this handbook is to enable Soldiers to be successful in utilizing all the capabilities of DCGS-A based on the Lessons Learned from Brigade Combat Teams that have passed through the NTC during Decisive Action and COIN Rotations. This handbook serves as a checklist and step by step process to establish connectivity and become interoperable with ABCS systems, CPOF and FFCB2. This Manual does not provide instruction on how to use DCGS-A.

2. TABLE OF CONTENTS

Foreward.....	Page 1
Pre NTC Tasks for the 350T/35T/ FSE Tasks.....	Page 2
ABCS Interoperability	Page 3-4
FTP set up.....	Page 5
IEO-MXL.....	Page 6
DDS Configuration.....	Page 7
DDS Connection.....	Page 8
Create XOL.....	Page 9
Create Advertisement.....	Page 10-11
Subscribe to Advertisements.....	Page 12
Publish Graphics.....	Page 13
Messaging.....	Page 14
NTC Data Flow.....	Page 15
NTC Architecture.....	Page 16
Glossary.....	Page 17

VALIDATION		DCGS-A OPERATIONAL CHECKLIST	PAGE 2 OF 17
SUBJECT: PRIOR TO ARRIVAL AT NTC		DATE Last Updated 27 MAY 2014	
ACTION POS	COMPLETE	CHECKLIST ITEM	
FSE or 35T	_____	<p>1. Security Classification High Water Mark (SCHWM) set to the correct classification;</p> <p>NOTE: It is best practice to work it out between the BDE and DIV to have the SCHWM set to the same classification across the force i.e. (SECRET or SECRET//NOFORN). NTC standard for all ABCS Systems is SECRET. *If one is set different than the other, some messages may not process into the TED database*</p>	
FSE or 35T	_____	<p>2. Ensure the latest quarterly IAVAs and antivirus have been applied to all the servers as well as the laptops;</p> <p>NOTE: PM DCGS-A only puts out IAVAs quarterly, it is part of the accreditation process and validation of the IAVAs to ensure the patches do not break the system.</p>	
FSE or 35T	_____	<p>a. Login with an admin account; click properties on the security banner, the properties will have a list of the applied TBs and IAVAs;</p>	
FSE or 35T	_____	<p>3. Ensure the latest Antivirus definitions are applied to all software platforms;</p>	
FSE or 35T	_____	<p>a. Depending on the software platform, check to ensure the loaded definition date is within 7 days of the date it is being checked.</p> <p>NOTE: Here at NTC, DCGS-A systems must be IA compliant, loaded with McAfee Anti Virus and be on the most current version of DCGS-A software which is version 7.3</p>

VALIDATION	DCGS-A OPERATIONAL CHECKLIST		PAGE 3 OF 17
SUBJECT: ABCS ADDRESS BOOK CONFIGURATION STEPS		DATE Last Updated 27 MAY 2014	
ACTION POS	COMPLETE	CHECKLIST ITEM	
		<p>NOTE: Address Book is configured to send messages i.e. ENSIT, TACREP, TIDAT, and IEO-XML as well as to identify who messages come from when subscribing from the DDS server. There are two ways to configure the address book (Manual and C2R). The first section will go through C2R. C2R is required when sending messages to AFATDS and VMF messages. Steps A-F are required for C2R.</p>	
FSE or 35T	_____	<p>1. First ensure that the C2R services are running on the IOP server;</p>	
FSE or 35T	_____	<p>a. Navigate to Control Panel; Click Administration Tools; Click Services</p> <p>NOTE: If it is not started, navigate to C:\Program files (x86)\C2R; bin; then find the file "C2R_StartService.bat"; right click select Run As Administrator.</p>	
FSE or 35T	_____	<p>2. Navigate to Start; All Programs; DCGS; Messaging; Address Book; Options; Enter the Url information of the C2R server provided by the S6/G6 server team into the server IP box; Under TS3 Client Credentials; Ensure User Supplied Credentials is selected; Log In and Password are provided by S6/G6;</p>	
FSE or 35T	_____	<p>3. Open the Address Book on the IOP server; Click Start; All Programs; DCGS; Messaging; select "Address Book";</p>	
FSE or 35T	_____	<p>a. In the upper left hand side select File; Import; Expand Army by clicking on the + sign; Select the unit required; In the left pane, highlight the addresses you want to import; Select import, then close.</p> <p>NOTE: All fields below the server IP should automatically be filled in if you were provided with the correct IP from the S6/G6 server team and they have the LDIF loaded. Not all addresses are correct in the LDIF. If the address is for another DCGS-A IOP or ACE BLKII system you can change the information and ensure C2R address = "False". If the addressee is AFATDS the C2R address must be correct, if not contact the S6/G6 to change the information on the LDIF.</p>

Operator	_____	22. Client Connection to Remote AFATDS Applications Service (RAAS): System > Admin > Client/User > Make sure that MCS is connected (Status will show green and connected) > Verify MCS receives targets in their live feed.	
Operator	_____	23. Connect to PASS/DDS: Units > Track workspace > Options > Connect to Track Data Source > Connect > Role: Verify role matches > https://IP address of the server:(____)/PASS/DDS > User ID: role name > Password: _____ > Ok (verify server is up). The pane on the right will show the available subscription topic; the left pane shows the available publish topics > select the topics below	
Operator	_____	24. Publish to the following:	
Operator	_____	a. TARGETS	
Operator	_____	b. GRAPHICS	
Operator	_____	c. POS-RPT	
Operator	_____	25. Subscribe to the following:	
Operator	_____	a. Graphics from DCGS-A	
Operator	_____	b. Graphics from BCS3	
Operator	_____	c. Graphics from MCS	
Operator	_____	d. Graphics from AMDWS	
Operator	_____	e. Graphics from CPOF	
Operator	_____	f. POS RPT from FBCB2 and MCS	
Operator	_____	g. Correlated Blue (preferred over POS RPT from either MCS or FBCB2)	

VALIDATION	AFATDS OPERATIONAL CHECKLIST		PAGE 4 OF4
SUBJECT: AFATDS Configuration Sheet			
ACTION POS	COMPLETE	CHECKLIST ITEM	
		NOTE: To establish direct connectivity between AFATDS and DCGS, (verify URN and IP address with DCGS-A FSE/FSR). Ensure System Type is 47001C/USMTF 04. All C2R messaging must be sent to the DCGSAIOP. All DCGSA BAL's (PMFWS) will receive AFATDS info sent to the DCGSAIOP. DCGSABAL may direct message the AFATDS. DCGS may receive Geometries/FSCM's, Unit Locations and Target data from AFATDS and vice versa when connected to PASS/DDS. After AFATDS & DCGS-A has established direct messaging, the end result being that the DCGS-A can send the AFATDS a TIDAT (Target Indicator Data; aka Fire Mission Request).	

VALIDATION	AMDWS OPERATIONAL CHECKLIST		PAGE 1 OF 5
SUBJECT: AMDWS Configuration Sheet			DATE: Last update May 24,2014
ACTION POS	COMPLETE	CHECKLIST ITEM	
		<p>NOTE: Verify the following information: PASS/DDS Server IP Address, PASS Username, PASS/DDS Username Password and Local ID and Port#. Complete the following checklists to verify configuration:</p>	
Operator	_____	<p>1. Press the Power button located on the right side of the front panel to the Tadpole Topaz computer system</p>	
Operator	_____	<p>2. Press <Ctrl> + <Alt> + . The US Department of Defense Warning Statement appears. Log In: At the Login screen, enter the Username: _____ > Enter Enter the Password: _____ > Enter</p>	
Operator	_____	<p>3. Verify or change AMDWS Banner Bar settings</p>	
		<p>NOTE: The AMDWS Tactical Planner banner bar automatically launches after login; however, if the banner bar does not appear, perform the following steps to start AMDWS.</p>	
Operator	_____	<p>a.Select Start > All Programs > AMDWS > Start AMDWS to start the Tactical Planner. The AMDWS Tactical Planner banner bar appears</p>	
Operator	_____	<p>b. The banner bar appears at the top of the AMDWS screen. The banner bar contains the following visual indicators: Alerts, System Time Zone, Local Node, System Classification, Spot Report (SR), Target Reference Point (TRP), RAM Event Manager (REM), Check Fire (CF), Configuration, Planner, Services, Help, and Close.</p>	
		<p>Note: Place mouse pointer over icons on the banner bar to display a pop-up window with a short description of the selected icon. Observe the red, green, and yellow buttons with the associated number of the alerts on the left side of the banner bar</p>	
Operator	_____	<p>4. Alerts: Click the Alerts button to open the Alert Manager window.</p>	
		<p>NOTE: The maximum number of alerts that can be stored is 3000. Alert filters are provided based on alert types: RAM Alerts, Tactical Ballistic Missile (TBM) Alerts, Air Strike Warning Alerts, and Hostile Alerts. Click the corresponding symbol in the top section of the Alert Manager window to display a specific alert message type. To display all alert message types, click <Show All>.</p>	
Operator	_____	<p>a. Click the Resize Window button next to the Help button (i.e., the question mark icon) to expand the Alert Manager window</p>
