AtN Doctrine

Responsible for developing AtN doctrine with a primary focus on the Brigade and below levels. ATN/Network Engagement Doctrine Support provides development and integration of AtN/Network Engagement concepts into doctrine, DOTMLPF assessments, AtN/Network Engagement related SME support to other organizations and agencies and contributes to the development of other publications as requested.

AtN Operations

The AtN/Network Engagement Operations Team is the TRADOC Line of Effort lead for maintaining and executing Annex C of the TRADOC C-IED Campaign Plan. The team provides TRADOC with an assessment of progress related to AtN/Network Engagement doctrine development, integration, training, and education, and provides operational support to Doctrine Development and the Staff Attack the Network MTT. The Operations Team is the POC for scheduling Staff Attack the Network Training.

Dismounted C-IED Tactics
Master Trainer (DCT-MT)

The DCT-MT course is 10 days (80 hours) in length and culminates in the completion of situational training exercise (STX).
The class size is a minimum of 15 students and a maximum of 30 students; ranges and equipment will ultimately determine the size of the class.
The course is conducted in 2 phases over 10 days at **no cost** to the unit

Course Objective
Upon completion of this course, the Master Trainer (MT) will have the foundation to become an SME in CIED TTPs. The MT will apply knowledge to assist leaders with C-IED training, planning, executing, and supervising at company/battalion level. The MT will advise unit leaders and personnel about IED threats, recommend enablers to mitigate IED threats, incorporate C-IED TTPs into the Unit Training Plan, conduct a company level C-IED training program.

MCoE STAFF
Attack the Network MTT

The Staff Attack the Network(AtN)/Network Engagement MTT consists of 10 lessons, 5 STAFFEXs and a Virtual Simulation Capstone Exercise called the Enhanced Dynamic Geo-Social Environment (EDGE). The ten lessons provide tools and considerations that help units to effectively engage threat networks. EDGE is a computer-based simulation which uses an AtN/Network Engagement scenario designed to establish a virtual practical exercise after Soldiers have already received days 1 & 2 of training on AtN/Network Engagement concepts, doctrine, and principles. Training is conducted at **NO COST** to the unit.

The TSP lessons are as follows:
Lesson 1: Threat /AOR/JET Brief
Lesson 2: Introduction to AtN/Network Engagement
Lesson 3: Define the Operational Environment
Lesson 4: Network Concepts
Lesson 5: Intelligence and Analytical Tools.
Lesson 6: AtN/Network Engagement Enablers
Lesson 7: Exploitation
Lesson 8: Information Collection & Joint ISR
Lesson 9: Engaging the Network
Lesson 10: Assessment
Capstone Exercise: Enhanced Dynamic Geo-Social Environment (EDGE)
