[11-25 Commander's Guide to Biometrics in Afghanistan Handbook](#) Posted On: April 19, 2011

This publication was produced in concert with HQDA Biometrics Identity Management Agency (BIMA), TF-435/TF Biometrics in Afghanistan, and with input from multiple organizations across the biometrics community. It outlines how employing biometric technologies support commanders and their units to identify, locate and defeat insurgent networks in the complex Afghanistan operating environment. It also covers leader responsibilities and how biometrics mission integration impacts full spectrum operations.

[Biometrics Extract from 06 OCT 2010, USAFOR-A TCOI](#) (ALLIS - you must register) [NFTF - Employing the Handheld Interagency Identity Detection Equipment \(HIIDE\) Device in 2SCR](#) Posted On: September 24, 201 Article outlines 2SCR's successes and challenges of employing the Handheld Interagency Identity Detection Equipment (HIIDE) device in Afghanistan. It outlines how the equipment is being employed, technical specifications, and recommended improvements.

[09-35: Biometrics in Support of Identity Dominance Newsletter](#) - By P. Keith Warman ([download .pdf](#))

Key lessons:

- Leaders at all levels must be aware of biometric capabilities in order to drive the staff process and integrate biometrics into operations.
- Biometrics coupled with all-source intelligence analysis provide the "so what" for actionable intelligence and target folder development.
- Biometrics supports myriad operations including but not limited to detainee operations, improvised explosive device forensic operations, base access control, border control, and a wide variety of civil-military operations (population census, voter registration, finance payment verification, and medical civic action programs).

[Biometrics Training Outline for Battalion-sized unit](#) is a PowerPoint presentation with a biometric training plan for a battalion.

A pre-Deployment Training Plan was developed by the Biometrics Integrated Capabilities Development Team. This Document was approved by ARCIC and TRADOC. It was never implemented by either FORSCOM or TRADOC. It is not approved doctrine, but it remains the single most comprehensive document for unit training to date: [Pre-Deployment Training Plan Final Report 3 30 2007v3](#)

[BATS - User's Guide](#)

Biometrics training is necessary from the individual Soldier to division staff. Soldiers are key to biometrics operations on the battlefield. Leaders at all echelons are key to integrating biometrics capabilities to establishing identity dominance in their battlespace.

DTMS Individual Biometrics Tasks:

[[301-BT1-6009](#)] Perform Operator PMCS on the Biometrics Automated Toolset (BAT) System

[[301-BT1-6008](#)] Exchange Biometrics Automated Toolset (BAT) Data with Handheld Interagency Identification Detection Equipment (HIIDE)

[[301-BT1-6006](#)] Query the Biometrics Automated Toolset (BAT) Database

[[301-BT1-6007](#)] Produce Identification Badge with the Biometrics Automated Toolset (BAT)

[[301-BT1-6004](#)] Create Dossier in the Biometrics Automated Toolset (BAT) Database

[[301-BT1-6005](#)] Modify Biometric Automated Toolset (BAT) System Dossier

[\[301-BT1-6000\]](#) Prepare Biometrics Automated Toolset (BAT) System for Operation.

[\[301-BT1-6001\]](#) Update Biometrics Automated Toolset (BAT) Databases

[\[301-BT1-6002\]](#) Identify Subject using Biometric Automated Toolset (BAT)

[\[301-BT1-6003\]](#) Enroll Subject into Biometrics Automated Toolset (BAT)

Recognition of Combatants/IED (ROC/IED) from the Director, NVESD AMSRD-CER-NV-MSD, FT Belvoir, VA

NEW [Interactive web site ROC IED](#) Select either Iraq or Afghanistan. [CAC Login](#)

ROC-IED is an awareness level PC-based interactive multimedia trainer designed to teach Warfighters how to anticipate and prevent IED-related incidents in both Afghan and Iraqi theaters of operation. ROC-IED can be used alone as introductory level, self-paced counter-IED knowledge training, as a prerequisite or supplement to classroom and lane training, or as long-term sustainment training. ROC-IED is regularly evaluated and upgraded to address the ever-changing conditions in theater.

ROC-IED training is consistent with, and supports, US Army and US Marine Corps Counter-IED training. It's curriculum content is derived from US Army's Counter Explosive Hazards Center (CEHC) at Fort Leonard Wood and from the Marine Corps Engineer Center (MCEC) at Camp Lejeune. Its training effectiveness has been established by an ARL-HRED (Army Research Laboratory - Human Research and Engineering Directorate) evaluation conducted in 2008.

CENTCOM Biometrics Level of Training

Level	Audience	Purpose
I	Personnel entering the CENTCOM AOR	General overview of biometric and forensic capabilities
II A	BDE/BN/OPS/INTEL personnel	For personnel responsible for managing and implementing the BF program
II B	Personnel selected to be Biometric/Forensic operators	To provide personnel with operator training
II C	Unit trainers, FSEs, and subject matter experts	To train personnel to be unit trainers and subject matter experts
III	Intended for command and staff level officers on how to integrate biometric/forensics into operations.	To inform commanders and decision makers on the importance of BF and to provide ideas and examples of how to integrate it
IV	Is designed for General and Flag Officers and SES equivalents	Will explain the strategic concepts of exploiting biometric/forensic data and the importance of information sharing to further enhance BF capabilities

DRAFT
