SOP PURPOSE AND OVERVIEW:

- 1. The purpose of this SOP is to provide standards and guidance for maneuver company, battery, and troop CP operations throughout 2nd BCT (hereafter referred to only as "companies" for brevity)
- 2. This SOP dictates only the minimum required standards; commanders are highly encouraged to go beyond required standards and customize CP operations based on mission and personal preference
- 3. Exceptions to specific requirements within this SOP are authorized based on unique company missions (i.e. route clearance, QRF, security); companies with unique missions will modify their CP operations as required to best support their operations
- 4. New digital technology will be fielded throughout the deployment cycle that will streamline and modify specific Company CP procedures; companies must be prepared to update reporting, tracking, and analysis systems outlined in this SOP upon receipt of new technological solutions

SECTION 1: COMPANY COMMAND POST OPERATIONS

1. Mission of the Company CP:

"The CP assists the commander and his subordinate leaders in preparing for battle by providing a centralized point for information gathering and dissemination, coordination, time management, and tracking of unit status"

FM 3-90.1: Tank and Mechanized Infantry Company Team, Para. 3-253

- 2. The maneuver company will operate two command posts, a Main CP and a Company Trains Command Post (CTCP). The CP and CTCP can be collocated or separate based on mission requirements. The company will also operate a planning bay and rehearsal area.
 - a. Company CP:
 - (1) Company CP functions are identical to the Battalion TOC but on a smaller scale
 - (2) Responsible for company combat operations (see Paragraph 3 for CP functions)
 - b. Company Trains Command Post (CTCP):
 - (1) Based on unit mission and logistical support requirements, the CTCP may be a separate CP located on the BN FOB or a small entity co-located with the Company CP
 - (2) CTCP functions are identical to those of the Battalion ALOC/Combat Trains, but on a smaller scale:
 - Administrative Operations (awards, leave, interpreter management, etc.)
 - Logistical Operations (resupply, maintenance, property accountability, etc.)
 - (3) The CTCP is the alternate maneuver CP, if not co-located with the Company CP
 - (4) If the Company CP is located forward of the Battalion FOB and does not have SIPR connectivity, the CTCP will become the company's SIPR access point; CTCP manning must be adjusted to meet SIPR reporting requirements (MIRC Chat, Blue 1 reports, etc.)
 - c. Planning Bay:
 - (1) Used for company, platoon, and squad planning and orders briefs
 - (2) Used for AARs and patrol debriefs
 - (3) Used for briefing ISF; no sensitive information is on display
 - d. Rehearsal Area
 - (1) Used for conducting pre-patrol rehearsals
 - (2) Used for conducting unit and ISF training
- 3. Functions of the Company CP: The Company CP functions like the battalion TOC but on a smaller scale; the six basic TOC functions identified in *CALL Newsletter 95-7: TOC Operations* provide a basis for Company CP operations:
 - Receive information

- Distribute information
- Analyze information
- Submit recommendations to the commander
- Integrate resources
- Synchronize resources

a. Receive Information:

- (1) Receive messages, reports, and orders from subordinate units and higher headquarters
- (2) Monitor tactical situation
- (3) Maintain a journal of all significant activities and reports (RTO's log, SIGACT tracker)
- (4) Maintain and update unit locations and activities
- (5) Monitor enemy situation
- (6) Maintain a status of critical classes of supplies

b. Distribute information:

- (1) Submit reports to higher headquarters
- (2) Serve as a communications relay between units
- (3) Publish orders and instructions
- (4) Process and distribute information to appropriate units or staff sections

c. Analyze information:

- (1) Consolidate reports
- (2) Anticipate events and activities, taking appropriate action as required
- (3) Conduct predictive analysis based on the tactical situation
- (4) Identify information that relates to the commander's critical information requirements
- (5) Identify the need to execute contingency plans based on the current situation

d. Submit recommendations to the commander:

- Submit recommendations to the commander based on information available and analysis conducted
- (2) Submit recommendations to the Battalion TOC as required

e. Integrate resources:

- (1) Coordinate the integration of combat multipliers (fire support, aviation, MPs, engineers, PSYOP, CA, intelligence assets, armor, combat health support) into maneuver planning and execution
- (2) Request specific combat multipliers for specific missions
- (3) Manage interpreters and integrate into the patrol plan
- (4) Integrate joint and pure ISF missions into the patrol plan

f. Synchronize resources:

- (1) Coordinate the synchronization of combat multipliers to achieve the desired effects (echeloning fires, A2C2, combined PSYOP/CA missions, etc.)
- (2) Conduct clearance of fires
- (3) Synchronize combat multipliers with changes in the maneuver plan

4. Company Planning Bay:

- a. The company planning bay gives units the space and tools available to plan, AAR, and conduct patrol debriefs (see Section 3-5 for a complete list of planning bay equipment)
- b. The planning bay provides a suitable location to brief ISF; ensure that any classified or sensitive formation can be easily covered up for ISF briefings
- c. The planning bay includes maps and planning boards which allow the patrol leader to fill-in-theblanks while developing patrol orders (see Annex E for a patrol order format that can be permanently written on planning boards with space available for the patrol leader to write)
- d. The planning bay serves as a location for AARs and patrol debriefs; patrol AAR boards will be posted in a fill-in-the blanks format

2 E	ВСТ,	1(01 st	ABI	N DI	V (A	ASL	_T), (Com	ipan	y, Ba	atter	y, ar	nd Tr	оор	CP C)pera	tions	SOP)			
<u>SE</u>	CTIC																						
1.	The	e C de	Con ers r	npar nust	y Cl be	⊃ ma prep	anni are	ng p d to	lan r rotat	must te ac	t tak	e int onal	o ac pers	cour	nt pe el int	rsoni o and	nel le d out	ave, of Cl	refit, a	and ii y pos	njurie itions	s; cor	npany
2.	Cor	mp	oan	у Ва	ittle	Сар	tains	s (se	e Se	ectio	n 2-	6 for	r bat	tle c	aptai	in im	perat	ives):					

- a. Minimum two Officers or NCOs (E-5 and above) to facilitate day and night shifts (can be the company FSO & FSNCO or other designated personnel)
- b. Run current operations as the Company Battle Captain
- c. Assist the Intel NCO in running the Company Intelligence Cell as required
- d. Attend company Fusion, Targeting, and Planning Cell meetings (see Section 5)
- 3. Company Intelligence Cell Organization (see Section 6 for a complete description of Company Intelligence Cell operations):
 - a. At a minimum, companies will designate one capable NCO (or highly qualified Soldier) to serve as the Intel NCO; this Soldier must be highly competent, adequately trained for the position, and will have no significant duties other than running the Company Intelligence Cell
 - Additional manning for the Company Intelligence Cell will vary based on unit mission, manning, and commander's preference; personnel must periodically accompany patrols within the company AO in order to gain an understanding of the physical and human terrain (monthly at a minimum)
 - c. Below are two viable techniques for Company Intelligence Cell manning; commanders can use elements from one or both of these techniques to build a functional cell:

Technique 1: Platoon-centric Intelligence Cell

- (1) NCO plus 1-3 highly capable Soldiers per platoon designated as a platoon intel cell
- (2) Report to their platoon leadership but also take direction from the Company Intel NCO
- (3) Patrol with their platoons and serve as subject matter experts on intelligence collection, tactical site exploitation (TSE), tactical questioning (TQ), informant operations, and detainee operations
- (4) Assist the Platoon Leader and Company Intel NCO with patrol debriefing and intelligence analysis to include use of all intelligence programs, tools, and databases
- (5) Platoon Intelligence Cell members require specific pre-deployment training on both collection and analysis in addition to their basic MOS skills

Technique 2: Company-centric Intelligence Cell

- (1) Team-sized element of capable Soldiers working for the Company Intel NCO
- (2) May patrol with platoons as required to assist in intelligence collection, TSE, and TQ
- (3) Conduct patrol debriefs and supervise detainee operations
- (4) Conduct intelligence analysis and ensure that platoons are briefed before patrols
- (5) Company Intelligence Cell members require specific pre-deployment training on both collection and analysis in lieu of their basic MOS skills
- The Company Intelligence Cell must work closely with the battle captains to ensure that intelligence is being collected, tracked, and reported effectively

4. Company RTOs:

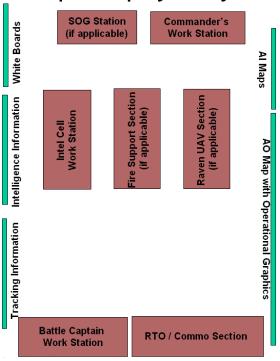

- a. Minimum six RTOs if the CP and CTCP are separate; if co-located, four RTOs are required
- b. Minimum two RTOs must be specially trained and highly proficient with all communications equipment; one each must be within easy reach of the CP and CTCP to assist the other RTOs
- c. Injured personnel can serve as temporary RTOs, but they must have the training to operate all communications and tracking tools in the CP

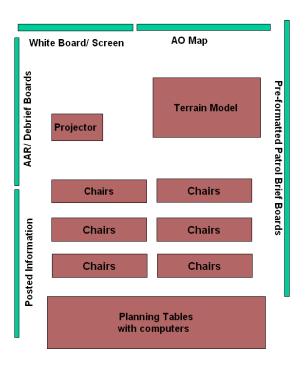

- d. RTO Breakdown:
 - (1) Day CP RTO
 - (2) Night CP RTO
 - (3) Day CTCP RTO (if CTCP not collocated)
 - (4) Night CTCP RTO (if CTCP not collocated)
 - (5) Commander's RTO (assists Day CP RTO when not out with the commander)
 - (6) Float RTO (Floats to allow RTOs to refit, attend training, and go on leave)
- 5. Based on battalion requirements, if the company CP is not on the same FOB as the Battalion TOC, one company leader may need to physically locate on the BN FOB on a rotational basis; this leader attends battalion targeting meetings and coordinates with staff elements
- Battle Captain Imperatives:
 - a. The battle captain runs the CP and must take ownership of all activities within; his orders both in the CP and to units in the field carry the weight of the commander
 - b. The battle captain must be prepared to clear fires as required; he must know the exact location of all friendly units in the company AO and have a rehearsed clearance-of-fires battle drill
 - c. The battle captain must understand the commander's intent and be capable of taking action in his absence
 - d. The battle captain must actively prevent fratricide within the company and with external units in the company AO to include ISF and engineer units; direct coordination with other companies and their higher headquarters is especially critical during operations on or near unit boundaries
 - e. The battle captain will submit timely, clear, and accurate reports to the Battalion TOC; he will also assist the company command group in completing and submitting daily reports to include:
 - (1) Blue 1 Report (daily summary)
 - (2) Green 2 Report (sensitive items accountability)
 - (3) Company LOGSTAT
 - (4) Company PERSTAT
 - (5) Commander's Update Brief
 - (6) Daily Targeting Report
 - f. The battle captain will enforce SOP patrol procedures to include pre-patrol and post-patrol actions (see Section 4 for patrol departure, tracking, and re-entry procedures)
 - g. The battle captain will be prepared to launch and employ company QRF elements as required
 - h. The battle captain will always have a CASEVAC plan for all units; if aircraft cannot fly, he will designate dedicated ground CASEVAC vehicles and personnel and determine CASEVAC routes
 - i. The battle captain will direct and control supporting aviation assets in the company AO
 - j. The battle captain must not allow the CP to become crowded; it is not a hang-out
 - The battle captain must keep noise down inside the CP to facilitate clear communications; this is especially important during a troops-in-contact situation or when clearing fires
 - I. The battle captain will enforce OPSEC in the CP; he will ensure that Soldiers do not place their classified flash disks in NIPR computers and that open communications back to the U.S. are halted during periods of commo black-out or before sensitive operations
 - m. The battle captain must periodically accompany patrols within the company AO in order to gain an understanding of the physical and human terrain; he will patrol monthly at a minimum

2 BCT, 101st ABN DIV (AASLT), Company, Battery, and Troop CP Operations SOP
SECTION 3: REQUIRED EQUIPMENT
 Not all CP equipment will last the duration of an extended deployment; units should acquire replacement and repair parts for equipment most likely to fail (printers, CD drives, hand mikes, etc.)
2. Sample Company CP and Planning Bay layouts (individual company layouts will vary based upon space available and commander's preference):

Sample Company CP Layout

Sample Planning Bay Layout

3. Company CP Equipment:

- a. Communications Equipment:
 - (1) Minimum three FM radios with power amplifiers, antennas, and current COMSEC
 - Battalion Command Net
 - Company Command Net
 - Fires Net or Battalion O&I Net (based on situation)
 - (2) Blue Force Tracker
 - (3) TACSAT (if available and subordinate maneuver units have a TACSAT)
 - (4) HF Radio (if available and subordinate maneuver units have HF radio)
 - (5) VOIP Phone (if SIPR available)
 - (6) Informant Cell-phone with the following Arabic phrase attached to the phone: "Da-kee-ka, moo-tar-jin rah hee-jee": "Wait one minute, an interpreter will come"; interpreters must be available at all times to assist with informant phone calls
 - (7) RTO Log (never throw away completed logs in case of legal investigations)
 - (8) Current commo card
 - (9) Laminated pre-formatted MEDEVAC card (Refer to Annex I)
 - (10) Laminated pre-formatted UXO/IED card (Refer to Annex J)
 - (11) Back up generator for CP communications

b. Digital Equipment:

- (1) Minimum three computers
 - Battle captain computer (SIPR connected if available at CP)
 - Intelligence computer (SIPR connected if available at CP)
 - Planning computer (must be able to be moved to the planning bay)
- (2) Color printer
- (3) Projector and screen or large-screen TV
- (4) Designated secret flash discs for transferring intelligence
- (5) CP computers must have required intelligence, reporting, and tracking software installed based on mission, availability, and commander's preference (TIGR Net, CIMS, Falcon View, Access Pro, Crystal, etc.)

- (6) Raven UAS Work Station with TV Display and MIRC Chat (if SIPR available at CP)
- c. Tracking Tools (may be maintained digitally, but a current hard copy must be displayed):
 - (1) Large AO map with operational graphics and moveable unit icons (see Annex A-1)
 - (2) Al maps (see Annex A-2)
 - (3) SIGACT tracker (digital or on butcher block)
 - (4) Patrol tracker (see Annex A-3)
 - (5) Personnel number tracker (how many total personnel are at each location or patrol)
 - (6) Forward LOGSTAT tracker (if CP is not co-located with the CTCP)
- d. Intelligence Tools (may be maintained digitally, but a current hard copy must be displayed):
 - (1) Current BN CCIR with associated company SIR
 - (2) Current Personnel and Vehicle BOLO List
 - (3) Tribal Overlay (see Annex B-1)
 - (4) Political Overlay (see Annex B-2)
 - (5) Key Infrastructure Overlay (see Annex B-3)
 - (6) Neighborhood Overlays (if required) (see Annex B-4)
 - (7) Religious Overlay (see Annex B-5)
 - (8) Enemy SITTEMPs (with link diagrams as required) (see Annex B-6)
 - (9) Pattern Analysis Tools (see Annex B-7)
 - (10) Informant Overlay (see Annex B-8)
 - (11) Predictive analysis board (predictions for next 48 hours and for next few weeks posted)
 - (12) Cork board to post new products from the Battalion S-2
 - (13) Current SWEAT Assessments
 - (14) Current light and weather data
 - (15) Detainee processing kits with additional sworn statements
- e. Critical information (may be maintained digitally, but a current hard copy must be displayed):
 - (1) Current IO themes
 - (2) Company, Battalion, and BCT mission statements and commander's intent
 - (3) Current troop to task & battle rhythm
 - (4) Sector sketches for company TCPs and defensive positions
 - (5) Posted patrol schedule
 - (6) Three dry erase boards
 - Tasking Board
 - Tracking Board
 - Sketch/Hasty Planning Board
- f. Fire Support Station (if applicable)
 - (1) LCMR Computer (if LCMR available)
 - (2) Incoming IDF warning siren system (if LCMR available)
 - (3) Mortar work station (if applicable)
 - LHMBC
 - Fire mission planning board
 - LMR (to talk to guns)
- g. Sergeant-of-the-Guard (SOG) Station (if applicable)
 - (1) LMR set to guard frequency
 - (2) Combat Outpost Sector Sketch
 - (3) SOG Checklist
- h. Furniture and supplies:
- (1) 3-5 large tables
- (2) 4-10 chairs
- (3) Dry erase markers, dry eraser, permanent and non-permanent map markers, protractor, yardstick, lamination paper, scissors, pins
- 4. CTCP Equipment (most equipment required only if CTCP is separate from Company CP):

- a. Communications Equipment
 - (1) Minimum two FM radios with current COMSEC available
 - Company Command (required only if CTCP is separate from Company CP)
 - A&L (can be switched to BN CMD based on situation)
 - (2) VOIP Phone (required only if CTCP is separate from Company CP)
 - (3) RTO Log (required only if CTCP is separate from Company CP)
 - (4) Current commo card (required only if CTCP is separate from Company CP)
- b. Digital Equipment:
 - (1) NIPR company admin computer
 - (2) SAMS-E computer
 - (3) SIPR computer (required only if CTCP is separate from Company CP)
- (4) Printer (required only if CTCP is separate from Company CP)
- c. Tracking Tools:
 - (1) LOGŠTAT tracker
 - (2) Posted patrol schedule (required only if CTCP is separate from Company CP)
- (3) AO map with operational graphics (required only if CTCP is separate from Company CP)
- (4) Area of Interest (AI) maps (required only if CTCP is separate from Company CP)
- (5) Two dry erase boards
 - XO/1SG tasking board
 - Admin & logistics board
- d. Furniture:
 - (1) 1-4 large tables
 - (2) 2-8 chairs
 - (3) Dry erase markers, dry eraser, permanent and non-permanent map markers, protractor, yardstick, lamination paper, scissors, pins (required only if CTCP is separate from Company CP)
- 5. Planning Bay Equipment:
 - a. Planning & Briefing Tools:
 - (1) Large AO Map with Operational Graphics
 - (2) 4-10 dry erase boards pre-formatted for planning in permanent marker
 - (3) 3-5 dry erase boards pre-formatted for patrol AARs
 - (4) One butcher block tablet
 - (5) Planning table
 - (6) Projector and screen or large-screen TV
 - (7) Sand table
 - (8) 10-20 chairs
 - b. Posted Information:
 - (1) Current IO themes
 - (2) Company, Battalion, and BCT mission statements and commander's intent
 - (3) Sector sketches for company TCPs and defensive positions
 - (4) Copies of all intelligence overlays posted in the CP (except informant overlay)
 - (5) Removable opaque covers for all sensitive information (to declassify the planning bay)
- 6. Rehearsal Area Equipment:
 - a. Rehearsal Area
 - (1) Large enough open area to accommodate section-sized rehearsals
 - (2) Engineer tape and stakes (to construct floor plans, terrain features, helicopter seats, etc.)
 - b. Rehearsal Board
 - (1) One Dry erase board with markers and eraser
 - (2) Posted MTPs for frequently conducted tasks

SECTION 4: PATROL DEPARTURE, TRACKING, AND RE-ENTRY PROCEDURES

- 1. Pre-Patrol Procedures: Individual measures can be waived by the battle captain only in the event of an emergency departure. Units on QRF will have all pre-patrol requirements complete prior to assuming QRF. The battle captain is responsible for ensuring that departing patrols meet all requirements.
 - a. A FRAGO and/or convoy brief is issued and disseminated to all personnel to include ISF and attachments; order should be sufficiently detailed in accordance with unit SOP (see Annex E for a sample pre-formatted patrol order)
 - b. PCIs/PCCs are conducted on all soldiers and vehicles using PCI/PCC checklists (see BCT Consolidated SOP, Chapter 2, for vehicle PCI/PCC checklist)
 - c. Rehearsals are conducted in the company rehearsal area:
 - (1) Critical patrol tasks, as identified by the patrol leader, are rehearsed prior to each patrol
 - (2) ROE and EOF are rehearsed weekly at a minimum, or after any procedural changes
 - (3) Vehicle, rollover, egress, and recovery drills are rehearsed weekly at a minimum
 - (4) Weapon crew drills are rehearsed weekly at a minimum
 - (5) Mounted and dismounted battle drills are rehearsed weekly at a minimum

- (6) Other rehearsals are conducted as directed by the commander
- Patrol Warlock and ECM systems are tested (if Warlock test equipment is available); the battle captain will be warned to ensure he anticipates the temporary communication interference
- e. Radio checks are conducted on primary, alternate, and contingency/emergency (PACE) communications equipment within the patrol, with the Company CP, and with any unit with which link-up procedures are planned
- f. The patrol leader will receive an updated intelligence brief from the Company Intelligence Cell
- g. The patrol leader will receive an updated friendly situation brief from the battle captain; key information from this brief is the location, mission, and contact information for all coalition units in the patrol's AO and AI
- h. The patrol leader will provide the following information to the battle captain:
 - (1) Patrol task and purpose
 - (2) Patrol graphics to include routes and fire control measures
- (3) Estimated timeline
- (4) Completed patrol pass (see Annex K for a sample patrol pass format)
- i. The battle captain ensures that all security personnel and/or nearby patrols are briefed on the patrol departure plans, re-entry plans, and any associated fire control measures

2. Departure Procedures:

- a. The patrol leader ensures that Soldiers load weapons and switch on all Warlocks and ECM equipment as the patrol leaves the wire
- b. The patrol leader calls the battle captain as he physically leaves the wire; he reiterates task, purpose, and personnel & vehicle numbers for the battle captain
- c. The battle captain calls departure to the Battalion TOC; he reiterates task, purpose, and personnel & vehicle numbers for the Battalion TOC

3. During the Patrol:

- a. The patrol leader will call a radio check with an accurate grid location every 30 minutes at a minimum; if stationary the patrol leader must still call and report no change to location
- b. If primary and alternate communications with a patrol fail, the battle captain will be prepared to execute a loss of communications contingency plan according to unit SOP and/or mission specific patrol planning. At a minimum:
 - (1) If the patrol is unable to re-establish communications on primary and alternate systems, the patrol leader will initiate the contingency communications plan (probably a visual signal)
 - (2) Once a planned radio check elapses, the battle captain will attempt to initiate communications with the patrol; if this fails he will instruct security personnel and nearby coalition elements to watch for contingency and emergency signals
 - (3) Upon identification of a contingency or emergency signal, the battle captain will react to the signal according to the unit SOP and/or mission specific patrol plan
 - (4) If no signal is observed, the battle captain will direct another patrol, a UAS, or an aviation asset to check the last known position of the missing patrol; movement must be initiated within 30 minutes of the missed radio check

- The battle captain will track accurate patrol locations on the AO map; he must always be prepared to clear fires anywhere in the company AO
- d. Units in contact will call report accurately to the battle captain; for direct fire contact this includes estimated distance, direction, and description
- e. The patrol leader will report to the battle captain anytime he enters or leaves a secured area (i.e. report arrival at the BN FOB back to the Company CP located at a combat outpost)

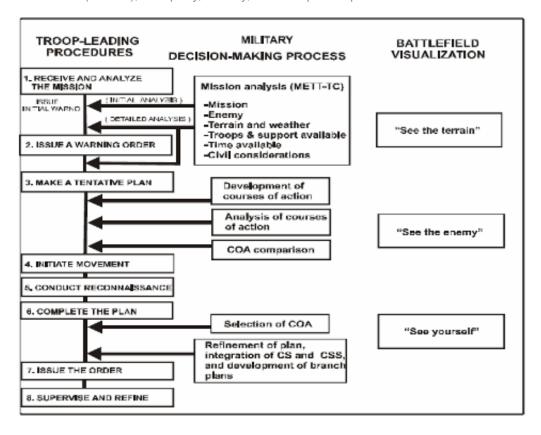

4. Post-Patrol Procedures:

- a. The patrol leader calls in his return before entering the engagement areas of any security personnel; the battle captain then ensures that all security personnel are briefed
- b. The patrol leader ensures that all weapons are cleared and that electronic warfare equipment is turned off as the unit re-enters a secured area
- c. The patrol leader checks in with the battle captain either by radio or in person; the battle captain also informs the Battalion TOC that the patrol has returned
- d. The battle captain ensures that all security personnel and relevant patrols know that the patrol has returned and are aware of current fire control measures
- e. The patrol conducts a full debrief and AAR in the planning bay, with a Company Intel Cell representative present, during which time information and intelligence is consolidated
- f. Company Intelligence Cell personnel conduct a patrol debrief with the patrol leader, completing a digital patrol de-brief (see BCT Patrol Debrief SOP), updating the Informant Personal Information Sheet (see Annex F) and the Informant Contact Log (see Annex G) after any meetings with company informants or potential informants, and digitally updating the Biographical Data Reports for any key leaders (see BCT Engagement SOP, Annex B)
- g. The Company Intelligence Cell and patrol leader update all patrol trackers, intelligence trackers, and unit databases
- h. The battle captain and patrol leader update the "honesty trace" (see Annex A-1h)

SECTION 5: COMPANY FUSION, TARGETING, AND PLANNING CELL

- 1. Organization of the Company Fusion Targeting, and Planning Cell: The cell meets regularly (minimum once per week) but is not a permanently manned organization; it exists to assist the company commander to assess past operations and to plan future operations
 - a. Key personnel:
 - (5) Company Commander or XO
 - (6) FSO or FSNCO
 - (7) Primary battle captain
 - (8) Company Intel NCO (and other members of the Company Intel Cell as required)
 - b. Resources required:
 - (1) Operations map with current "honesty trace" (see Annex A-1h)
 - (2) Updated intelligence trackers
 - (3) Updated patrol trackers
 - (4) All patrol debriefs and contact reports since the last meeting
 - (5) Updated informant log and biographical data reports
 - (6) Updated SWEAT assessments
 - (7) Current troop-to-task
 - (8) Recent battalion intelligence

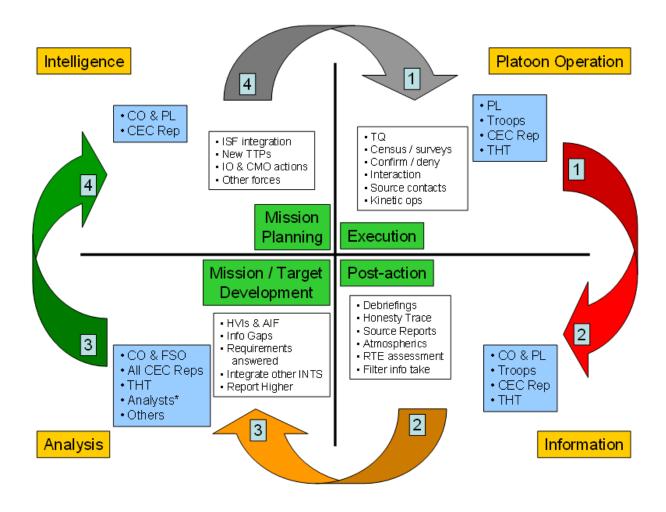

- (9) Recent battalion FRAGOs
- 2. Duties of the Company Fusion Targeting, and Planning Cell:
 - Within the Operations Process "Plan, Prepare, Execute, and Assess" the cell conducts the functions "Assess" and "Plan"
 - b. Assess:
 - (1) Review patrol debriefs and "honesty trace" to identify patterns set by friendly forces
 - (2) Review patrol debriefs and intelligence trackers to identify enemy trends, possible lethal or non-lethal targets, and anticipated future enemy courses of action
 - (3) Determine which trends and targets need further refinement by battalion or higher S-2; push the data to battalion S-2 for further analysis
 - (4) Determine which trends and targets need further information that can be developed by company-level intelligence collection
 - (5) Determine which trends or targets require offensive action or a change to company operating procedures
 - (6) Review and update the SWEAT assessments as required
 - (7) Review relevant measures of effectiveness (MOE) and determine general trends
 - c. Plan:
 - (1) Review battalion FRAGOs to identify assigned missions and other specified tasks
 - (2) Review troop-to-task versus assigned missions to identify which units, dates, and times are available for additional company missions
 - (3) Plan missions based on results of enemy assessment
 - (4) Identify necessary changes to company operating procedures based on patterns being set
 - (5) Plan in accordance with BCT targeting methodology to gain and maintain direct or indirect contact across all four BCT lines of operation (LOO) (see Annex D for more information on the BCT targeting methodology):
 - Security LOO
 - Economy LOO
 - Government LOO
 - Services LOO
 - d. End state to cell meetings:
 - (1) A draft FRAGO for company operations
 - (2) An analysis of the enemy situation for the battalion S-2
 - (3) An updated SWEAT assessment for the battalion civil affairs team
- Troop Leading Procedures (TLPs): When the company must conduct a deliberate operation, detailed
 planning is required beyond that conducted in a normal Fusion, Targeting, and Planning Cell meeting;
 the cell will assist the commander in conducting TLPs
 - a. The Fusion, Targeting, and Planning Cell provides the commander with a small staff that enables him to conduct a more detailed mission analysis and develop multiple COAs; TLPs in this situation will more closely resemble the traditional battalion MDMP:

- b. Risk assessment of both tactical and accidental risk is a critical component of both TLPs and daily planning; particular attention must be paid to the risks created by Soldier complacency and fatigue during extended steady-state operations
- c. Special attention to fire control measures and fratricide prevention must be given during TLPs when working with non-U.S. personnel

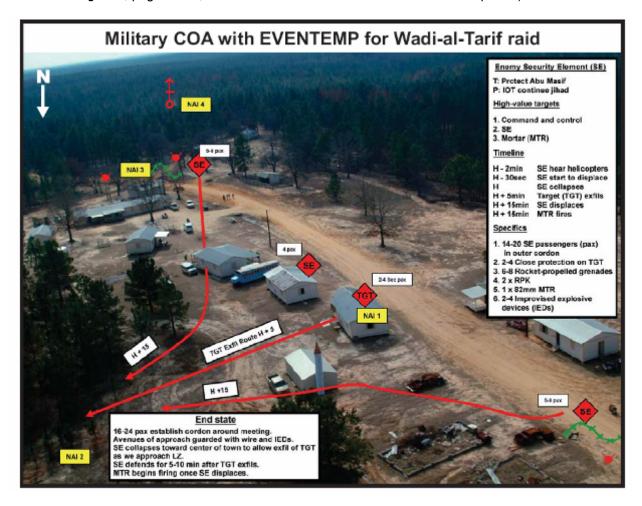

SECTION 6: COMPANY INTELLIGENCE CELL OPERATIONS

- 1. However the commander decides to task organize and employ the Company Intelligence Cell (see Section 2-3), the cell is responsible for assisting the commander with intelligence analysis, reporting and dissemination, detainee operations and tactical site exploitation, and intelligence collection
- 2. An effective Company Intelligence Cell will operate in a continuous cycle from mission development, through planning, execution, and post-patrol actions, and back to mission development in preparation for the next patrol:

- 3. The Company Intelligence Cell will ensure that all reports, database entries, patrol debriefs, and detainee packets have Arabic names, titles, and tribes spelled in accordance with the theater transliteration spelling standards (see Annex L for an inclusive list of transliteration standards); this facilitates tracking of individuals in theater and unit databases
- 4. Intelligence Analysis Requirements:
 - The Company Intelligence Cell will assist patrol leaders in conducting all patrol debriefs in accordance with the BCT Patrol Debrief SOP
 - b. The Company Intelligence Cell will continuously update all intelligence trackers and databases (see Annex B) and maintain situational awareness within the company AO and AI
 - c. The Company Intelligence Cell will conduct predictive analysis and maintain a predictive analysis board identifying likely enemy activities both over the next 48 hours and over the next few weeks
 - d. The Company Intelligence Cell will analyze friendly trends from the enemy's perspective and identify unnecessary vulnerabilities and patterns the company is setting
 - e. The Company Intelligence Cell will request assistance from the Battalion S-2 to conduct specific detailed analysis beyond company capabilities
 - f. The Intel NCO will attend company Fusion, Targeting, and Planning Cell meetings (see Section 5)
 - g. The Company Intelligence Cell will assist the battle captain in enforcing OPSEC

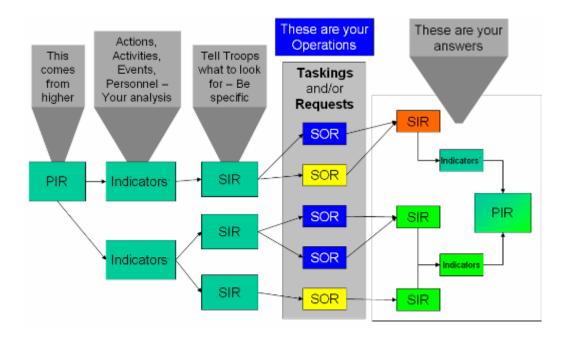

h. During TLP mission analysis, the Company Intelligence Cell will develop an Event Template (EVENTEMP) which identifies the enemy's most probable course of action with respect to time; this analysis assists the commander in developing his plan (see *CALL Newsletter 07-01: Tactical Intelligence*, page 49-50, for detailed information on EVENTEMP development):

- 5. Intelligence Reporting and Dissemination Requirements:
 - a. The Company Intelligence Cell will establish clear communications with the Battalion S-2 and ensure that information flows both up and down the chain of command in a timely manner; the Intel NCO must be proactive and pull information from the Battalion S-2 and supporting agencies as required
 - b. The Company Intelligence Cell will ensure that all patrols have updated intelligence information prior to departure to include updated intelligence from the Battalion S-2 (see Section 4-1f)
 - c. The Company Intelligence Cell will brief attachments and units operating within the company AO
 - d. The Company Intelligence Cell will post updated intelligence information for ease of reference by patrol leaders; appropriate OPSEC must be observed when choosing a location in which to post
 - e. The Company Intelligence Cell will assist the commander in writing Paragraph 2 of combat orders
- 6. Detainee Operations and Tactical Site Exploitation Requirements:
 - a. The Company Intelligence Cell will supervise company detainee operations and ensure that detainees are processed in accordance with the "5 Ss and T" (refer to the Strike Detainee

Operations SOP and CALL Handbook 06-17: Detainee Operations at the Point of Capture for more detailed information):

- (1) Search: Ensure all items taken are bagged and properly documented on a DA Form 4137 (see Strike Detainee Operations SOP, Tab B)
- (2) Silence: Ensure detainees do not communicate with one another after capture
- (3) Segregate: Keep detainees separate while respecting Iraqi cultural values (i.e. do not unnecessarily remove a female from the view of a male relative, do not take young children from their mother, never roughly handle a male in front of a female)
- (4) Safeguard: Ensure detainees are protected from enemy attack, receive required medical care, and are not abused or humiliated by U.S. or Iraqi forces
- (5) Speed: Ensure detainees are evacuated to the rear with adequate time to process into the BCT's Division Holding Area Annex (DHAA) in accordance with theater policy:
 - The detainee must transfer to the DHAA within 24 hours of physical capture
 - The Intel NCO can request a 12 hour extension for operational concerns (36 hours total) by requesting the extension through the BN S-2 to the BCT S2X with final approval by the BCT DCO
- (6) Tag: Each detainee will be tagged with a completed Coalition Provisional Authority Forces Apprehension Form (see Strike Detainee Operations SOP, Tab B); captured equipment will be documented on a DA Form 4137 annotated with the name of the associated detainee
- The Company Intelligence Cell will establish a detainee holding area (if no battalion area is available on-sight) to hold detainees temporarily while the detainee packet is completed:
 - (1) Easily secured and guarded at all times by a Soldier briefed on the situation and ROE
 - (2) Provides protection from hostile fire
 - (3) Provides protection from the weather (blankets and/or extra clothes should be provided)
 - (4) Food and water are available
 - (5) Bathroom facilities are available
 - (6) Medical care is provided as required
- c. The Company Intelligence Cell will ensure that detainee processing is conducted in accordance with the Strike Detainee Operations SOP and any additional theater requirements; prosecution by the Central Criminal Court of Iraq (CCCI) is the goal for all detainee operations
- d. The Company Intelligence Cell will track company detainees from point of capture through prosecution by the CCCI; the BCT S2X is the point of contact for detainee tracking:
 - (1) Communicate with the BCT S2X and/or BCT JAG to ensure all submitted evidence is sufficient for prosecution, and collect or consolidate additional evidence as required
 - (2) Track detainees being released back into the Company AO and ensure that patrols implement increased security as required (i.e. released IED emplacer will likely result in an increase in IEDs at a location that had previously been quiet)
- e. The Company Intelligence Cell will serve as the subject matter expert on tactical site exploitation and evidence handling and will ensure that all exploitation operations are conducted and documented correctly; the Strike Detainee Operations SOP provides instruction for evidence handling and documentation
- f. The Company Intelligence Cell will follow up on documents and equipment turned in to higher headquarters for exploitation
- 7. Intelligence Collection Requirements:
 - a. The Company Intelligence Cell will receive, track, and answer battalion Priority Intelligence Requirements (PIR) by developing a company information collection plan:
 - (1) Determine what indicators, positive or negative, will answer battalion PIR
 - (2) Assist the commander in developing Specific Information Requirements (SIR) which address the identified indicators
 - (3) Assist the commander in developing Specific Orders or Requests (SOR) for patrolling units and other ISR assets; these should focus ISR to answer SIR
 - (4) Use SIR to assess the identified indicators and answer the battalion PIR

- b. The Company Intelligence Cell will identify little-known areas within the company AO that require informal assessments by patrols to identify key leaders, infrastructure, and basic population information; this information will also become company SIR and SOR
- c. The Company Intelligence Cell will coordinate for and liaison with any external intelligence collection assets working with the company
- d. The Company Intelligence Cell will ensure that company-level tactical questioning (TQ) does not inadvertently become unlawful interrogation by following the guidance in the 101st Airborne Division (Air Assault) Commander's Guide to HUMINT Operations and the Laws of Armed Conflict:
 - (1) Company TQ will involve direct questions only
 - (2) Company TQ will not use interrogation approaches, defined as "any means used to entice a detained person to give information he would not normally give"
 - (3) At no time will TQ involve threats directed at the detainee or his family
- e. The Company Intelligence Cell will ensure that company-level informant operations do not inadvertently become unlawful source operations by following the guidance in the 101st Airborne Division (Air Assault) *Commander's Guide to HUMINT Operations* and the Laws of Armed Conflict:
 - (1) Company informant operations are defined as passive versus active HUMINT collection
 - (2) Company informants may be sensitized to general information useful to the unit, but may not be tasked, either directly or implied, to collect specific information ("ask, don't task")
- f. The Company Intelligence Cell will ensure that all casual and regular informants are entered into the Informant Contact Log (see Annex G) and have updated Informant Personal Information Sheets (see Annex F); the Intelligence Cell will coordinate with the BN S-2 and HCT (HUMINT Collection Team, formally known as THT) for review of these products and the assignment of contact tracking numbers
- g. The Company Intelligence Cell will assist the commander in ensuring that regular informants are paid and accounted for in accordance with theater policy

- h. The Company Intelligence Cell should make every effort to hand reliable informants over to the unit's HCT as soon as possible to become legitimate sources
- i. To facilitate walk-in informants, the Company Intelligence Cell will establish an informant meeting and debriefing area and ensure that security personnel are prepared to receive local national informants:
 - (1) The meeting room should have chairs or couches, a table, drinks available, an ashtray, large-scale unmarked maps for map-tracking purposes, and no windows
 - (2) When walk-in informants are expected, ensure that security personnel are well briefed on what to expect and what to do when an informant arrives

SECTION 7: COMPANY TAC CP OPERATIONS

- 1. Whenever the commander goes forward of the CP, he will establish a small-scale company Tactical Command Post (TAC CP) to facilitate effective command and control
- 2. TAC Requirements: The composition of the Company TAC will vary depending on the type, size, and duration of the operation, whether the commander is mounted or dismounted, and whether the TAC is reporting back to the Company CP or directly to the Battalion TOC
 - a. For communications to the Company CP or to higher headquarters, to subordinate units, and to supporting units (aviation, EOD, etc.), the TAC will employ a minimum of one primary, one alternate, and one contingency/emergency (PACE) communication system; refer to table below for capabilities and limitations of available communication systems:

System	Planning Range	System Capabilities	System Limitations
	ı tango		

SINCGARS:	12-20 km	- Wide distribution throughout BCT	- Line of sight system and is severely
Mounted with		- Range can be extended with	affected by terrain and weather; use LOS
Power		antennas or by setting up a retrans/	function on BFT and CPOF to estimate
Amplifier		relay station	terrain effects
SINCGARS:	3-7 km	- Wide distribution throughout BCT	- Short battery life (10-15 hours)
Dismounted		- Range can be extended with	- Line of sight system and is severely
		antennas or by setting up a retrans/	affected by terrain and weather; use LOS
		relay station	function on BFT and CPOF to estimate
			terrain effects
MBTR FM	2-5 km	- Much lighter than SINCGARS	- Limited availability in BCT
		- Does not require an RTO	- Less range than SINCGARS due to
		- Can use 3 volt batteries	reduced antenna capability
TACSAT	Unlimited	- Has FM as well as SATCOM	- Limited availability in BCT
		capability with longer range than	- Heavy system
		dismounted SINCGARS (4-10 km)	- Requires a trained operator
		- Mounted system with "X-Wing"	- Dismounted system must be stationary
		antenna can transmit while moving	for several minutes to set-up antenna for
			transmission
			- Poor transmission quality; must speak
			slowly to be understood
			- Short battery life (12-15 hours)
HF FM	Unlimited	 Not affected by physical location 	- Limited availability in BCT
		as much as TACSAT	- Heavy system
		- Mounted system can transmit while	
		moving	- Requires a trained operator
		 Variety of antennas available 	- Dismounted system must be stationary
		based on different missions and	for several minutes to ground system for
		required range of communications	transmission
			- Poor transmission quality; must speak
			slowly to be understood
			- Short battery life (12-15 hours)
LMR	1-3 km	- Wide distribution throughout BCT	- Limited range
		- Light weight	- Not all U.S. units have LMR
BFT	Unlimited	- Wide distribution throughout BCT	- Limited to mounted or CP operations
			only
Cell Phone	Unlimited	- Light weight	- Limited availability in BCT
		- Easy to have uninterrupted two-	- Very unsecure
		way conversations	- Limited cell phone coverage in rural Iraq
Satellite	Unlimited	- Light weight	- Limited availability in BCT
Phone		- Easy to have uninterrupted two-	- Unsecure
		way conversations	- Reception vulnerable to clouds & dust

- b. For contingency/emergency communications and visual signaling, the TAC will carry multi-colored starclusters, smoke grenades, IR strobes, VS-17 panels, a chemlight buzzsaw, a laser pointer, visible and IR lights, and other mission specific devices
- c. If an USAF Joint Tactical Air Control (JTAC) element accompanies the TAC, direct communication with USAF fixed wing aviation is possible via their specialized commo equipment; if not, the TAC must relay through the BCT or BN TOC to communicate with fixed wing support
- d. Battle Tracking: The TAC must be prepared to track the battle with one or more tracking tools:
 - (1) A laminated set of operational graphics with a permanent map marker to facilitate battle tracking (i.e. crossing off buildings that have been cleared)
 - (2) An execution checklist; the battalion TOC must be using the same execution checklist as the company TAC to facilitate clear communications
 - (3) If the TAC is mounted, the BFT can be used to aid in battle tracking
 - (4) Other specialized operational graphics as required (fire support, CASEVAC, etc.)
- e. Other Company TAC Equipment:
 - (1) Current commo card
 - (2) Extra batteries for all commo equipment

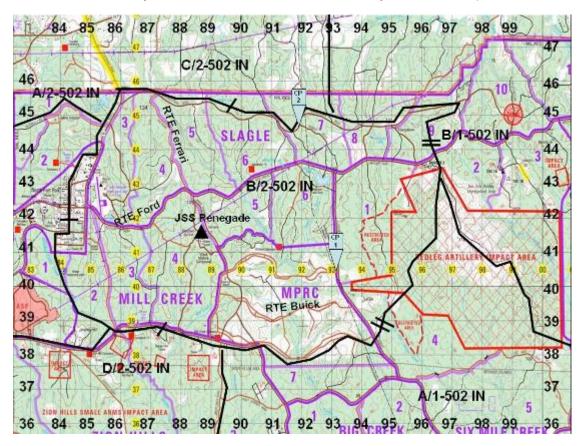

- (3) Hands-free style flashlights
- 3. Key TAC personnel: The company TAC can range in size from 2-20 personnel depending on the mission and attachments; ensure that all TAC personnel are briefed, rehearsed, and accounted for at all times
 - a. RTOs: Minimum of one RTO for company command net and one RTO for communications to higher; for shorter duration, smaller-scale operations, the commander can use the MBITR to talk on company command net, thus reducing RTO requirements to one
 - b. FSO/FSNCO: While not required for small-scale operations, the FSO or FSNCO can help the commander by directing fires, talking to supporting aviation assets, monitoring the fires net, and running the TAC while the commander runs the battle
 - c. Company XO: While not required for small-scale operations, the XO can help the commander by tracking and coordinating logistical support, running PZs, and supervising critical supporting efforts
 - d. Company 1SG: While not required for small-scale operations, the 1SG can help the commander by coordinating CASEVAC in conjunction with the company medic, running PZs, and supervising critical supporting efforts
 - e. Security: If the TAC is not co-located with a maneuver element, a dedicated TAC security element is required
 - f. Additional attachments: Based on the mission, attachments to the company TAC can include a JTAC team, intelligence collectors, CA and PSYOP personnel, EOD assets, MiTT personnel, and other mission specific attachments

ANNEX A: COMPANY BATTLE TRACKING TOOLS

- 1. Newly fielded digital technology such as TIGR Net has the potential to improve company-level battle tracking; units should feel free to replace or augment tracking tools described in this SOP as long as:
 - Approval is given by higher headquarters
 - Current hard copies of digital information are still posted in the CP
 - All mandated information is still tracked

2. AO Map:

- a. Large scale printed imagery of the AO and several kilometers of the adjoining area; map must be in a scale large enough to identify individual buildings and terrain features
- b. Laminate the AO map and have erasable map markers affixed next to the map
- c. Place a large cork board or metal surface behind the map to facilitate the use of push pins or magnets to battle track units and enemy events
- d. ID all Control Measures on the map in permanent marker:
 - (1) Company Boundaries
 - (2) Road Names
 - (3) Checkpoints
 - (4) Permanent U.S. or ISF facilities
 - (5) Phase lines and sector designations
 - (6) Building Numbering
 - (7) Rewrite grid zone designators in large numerals to facilitate reading from a distance
- e. The AO map should have a removable "honesty trace" overlay; patrols will trace their exact route after every mission to allow the Intel Cell to identify avoidable unit patterns

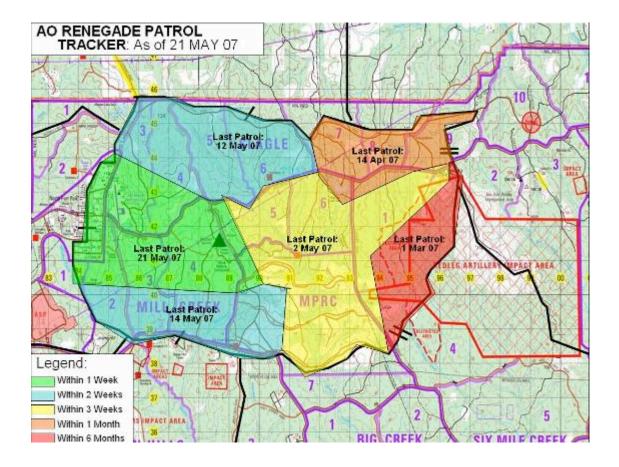

3. Area of Interest (AI) Maps:

- a. At a minimum, post one large map showing the entire AI; the size of this area is based on analysis and must show areas that affect the daily lives of the people in the AO or areas in which the unit may operate during a contingency mission
- Multiple smaller scale AI maps should be available (although need not be posted) to plan specific contingency missions or to conduct map tracking with informants (i.e. a map of Baghdad to show the route to the Green Zone or a map of Falluja to facilitate map tracking)

4. Patrol Tracker:

- a. Ensures that no areas of the AO are being neglected
- b. If "white pages" or a directory is being built, highlight areas that have not been catalogued
- c. One useful tracking technique is to "horse blanket" the company AO into smaller areas that can be easily referenced during the patrol debrief

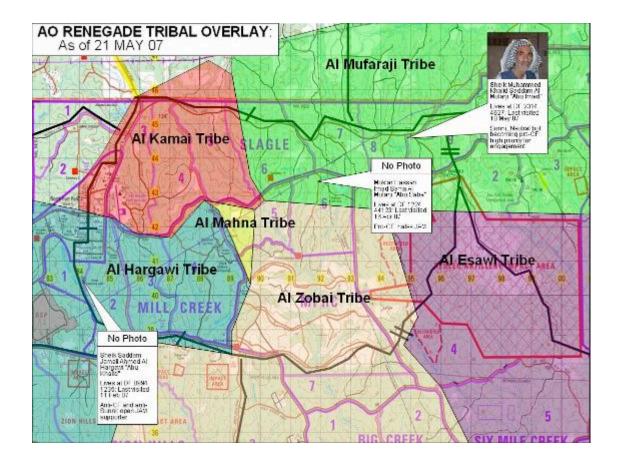

ANNEX B: COMPANY INTELLIGENCE TOOLS

- 1. Newly fielded digital technology such as TIGR Net has the potential to improve company-level intelligence tracking; units should feel free to replace or augment the MS PowerPoint based tracking tools described in this SOP as long as:
 - Approval is given by higher headquarters
 - Current hard copies of digital information are still posted in the CP
 - All mandated information is still tracked

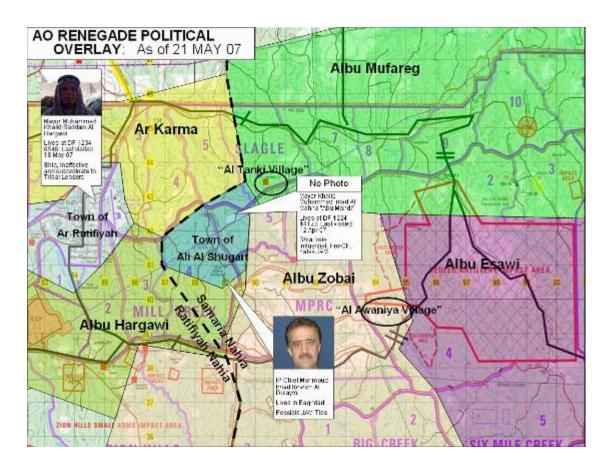

2. Tribal Overlay:

- a. Break down AO by tribal areas (most tribal areas are not 100% pure; this tracker shows the majority tribe in an area)
- Some tribes are not 100% Sunni or Shia even in a small area; identify sectarian enclaves on the tracker
- c. Identify all tribal and informal leaders: Sheikhs, Muktars, influential local leaders
- d. Leader pictures and tribe names can digitally hyperlink to existing digital reports

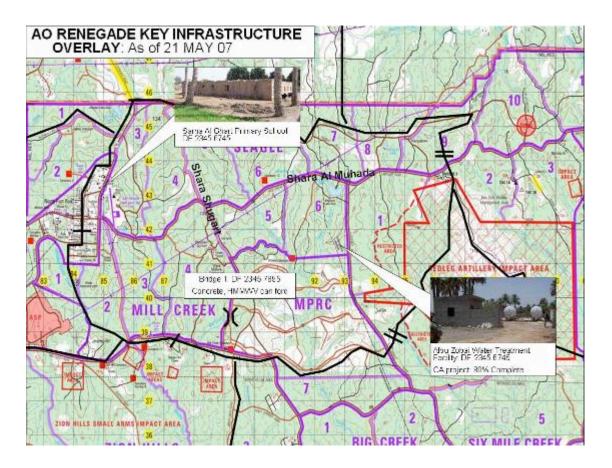

3. Political Overlay:

- a. Break down the AO by town or regional names (the names used by the local nationals)
- b. Identify Nahia and regional dividing lines
- c. Identify government leaders: Mayors, IP leaders, influential political leaders
- d. Leader pictures and town names can digitally hyperlink to existing digital reports

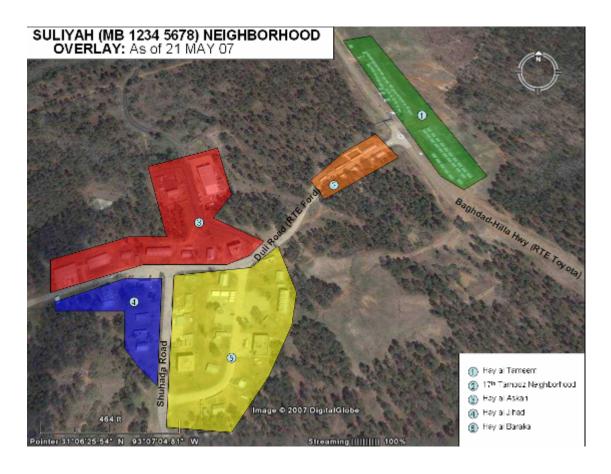

- a. Include road names using Iraqi naming conventions (not all roads in Iraq have are locally named)
- b. Include significant infrastructure, to include:
 - (1) Schools
 - (2) Public utilities
 - (3) Government buildings
- (4) Bridges(5) Medical facilities
- (6) Ongoing CA projects
- c. Infrastructure pictures can digitally hyperlink to more detailed information

5. Neighborhood Overlays (if required by the company AO):

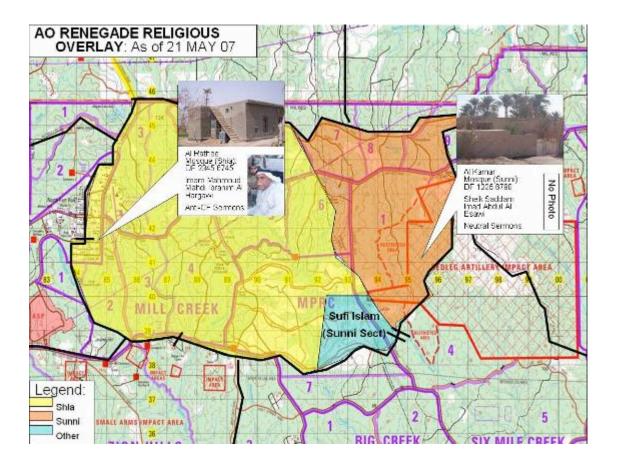

- a. Only required if the AO includes towns or cities with too much detail to include on the political and key infrastructure overlays
- b. Include neighborhood names, landmarks, and road names

6. Religious Overlay:

a. Break down the AO by religious/sectarian lines to include sectarian enclaves

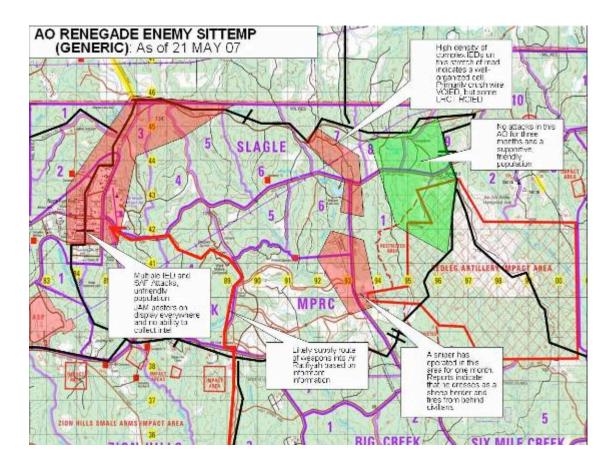

- b. Identify significant sects or sub-groups
- c. Imam and mosque pictures can digitally hyperlink to existing digital reports and previous mosque monitoring reports (see Annex H)

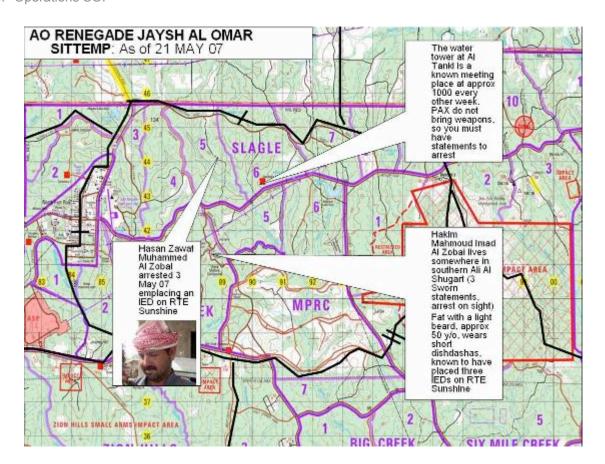

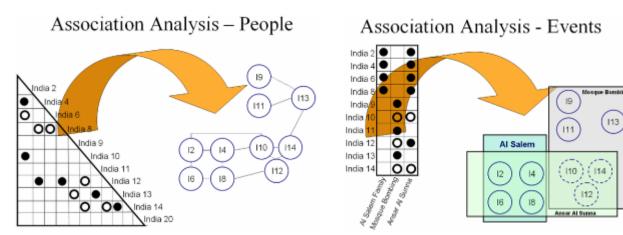

7. Enemy SITTEMPs:

a. Basic SITTEMP should include generic information about the enemy situation in the AO

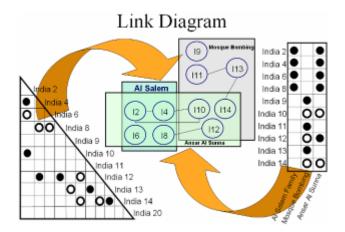

- b. Detailed SITTEMPs cover one group or threat in much more detail
- c. Ensure local nationals who should be detained on sight are identified on the SITTEMP
- d. Pictures can digitally hyperlink to more detailed information
- e. Association analysis tools and link diagrams can be used as required to further analyze enemy information as presented on specific SITTEMPs

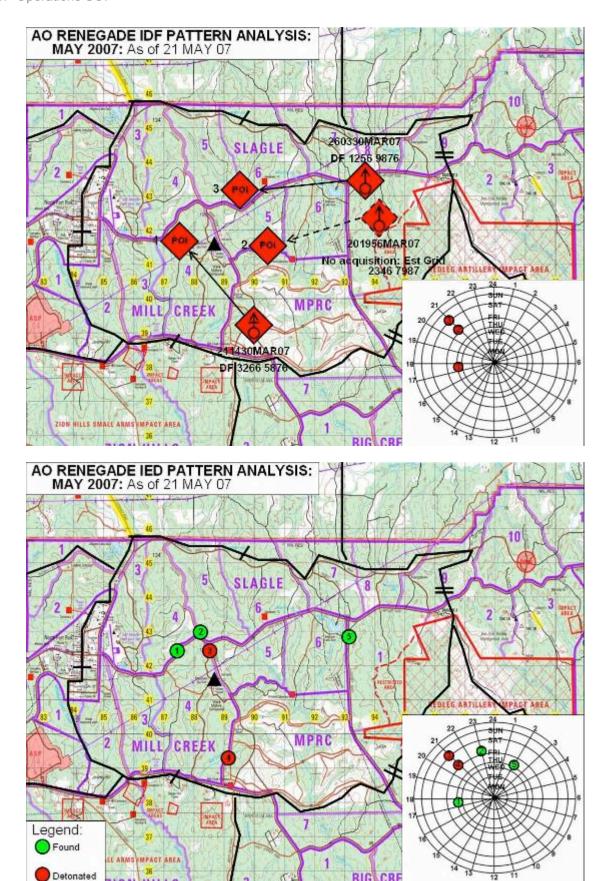

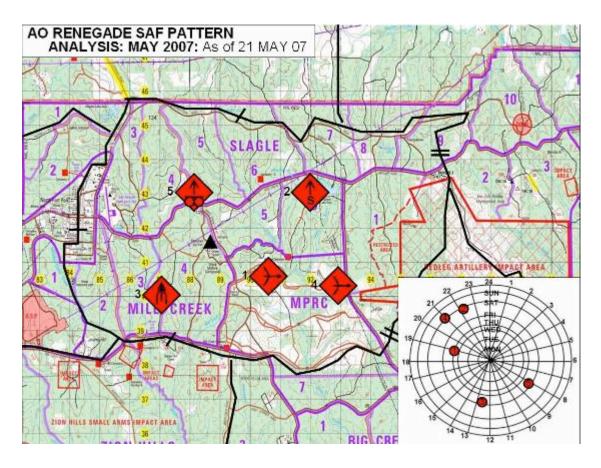

Annex B (Company Intelligence Tools) to 2 BCT, 101st ABN DIV (AASLT), Company, Battery, and Troop CP Operations SOP

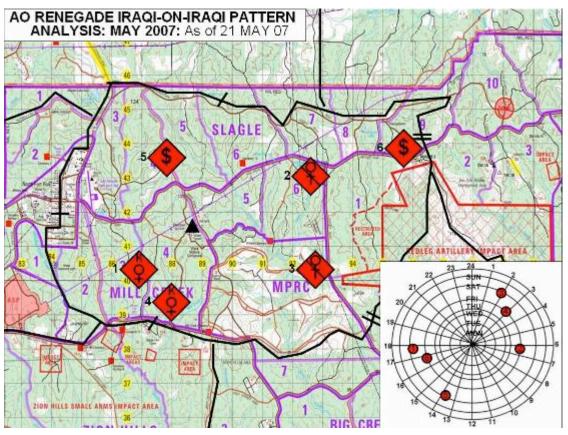

8. Pattern Analysis:

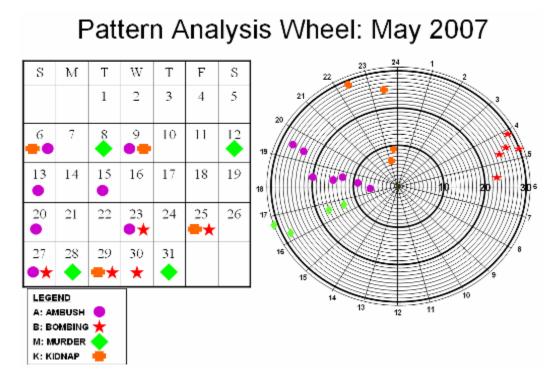

- a. Pattern analysis of attack times and locations will be conducted at the company level
- b. Mission and commander's preference will dictate how pattern analysis is conducted at the company level; this SOP is meant to guide rather than specify exactly what tools are used
- c. Predictive analysis is the end state for effective pattern analysis; specific analysis beyond what is presented in this SOP should be conducted whenever the Company Intel Cell believes that another external factor may be driving enemy patterns (i.e. nightly illumination may influence IED emplacement at a certain location, joint U.S./ISF patrols may draw more small arms fire than pure U.S. patrols, etc.)
- d. Pattern analysis can be conducted with separate time analysis wheels and location analysis maps, or the two can be combined into one product covering one specific form of enemy attack; this type of pattern analysis is represented below:
 - (1) IDF: Tracks acquired points of origin (POO) and points of impact (POI); un-acquired POOs will be estimated when possible and represented in dashed lines
 - (2) IED: Tracks IEDs found and IEDs detonated; IED symbols should be hyperlinked to associated IED reports
 - (3) SAF: Tracks SAF engagements, snipers, drive-by shootings, and short-range rocket fire; SAF symbols should be hyperlinked to associated SAF reports
 - (4) Iraqi-on-Iraqi: Tracks known and suspected insurgent activities against civilians; symbols should be hyperlinked to associated reports

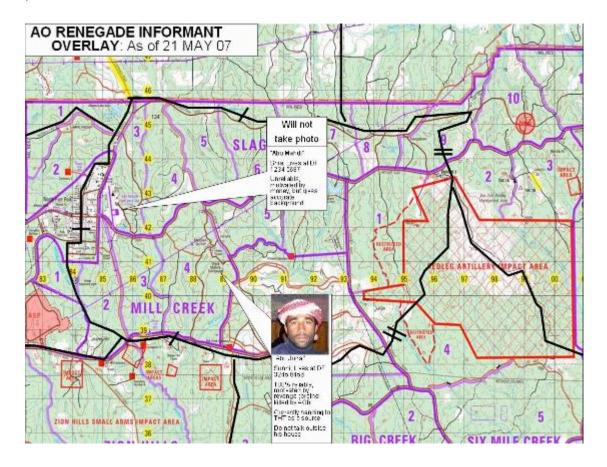

e. An example of a traditional time/date pattern analysis wheel is presented below; this technique can be used in conjunction with location analysis maps in lieu of using the form-of-attack specific combined pattern analysis overlays presented above:

9. Informant Overlay:

- a. Safeguard informant's real names; use aliases on the tracker and disclose real names only to leaders who you trust to be careful with the information
- b. Pictures can digitally hyperlink to more detailed information
- c. Ensure that all informant meetings are recorded in the Informant Contact Log (see Annex G) and have updated Informant Personal Information Sheets (see Annex F)
- d. The informant overlay must be tightly controlled as public knowledge would likely cause the death of company informants; hard copies of the should be shredded when obsolete and should not go forward on patrols nor be posted anywhere that ISF or interpreters can view

10. Other Intelligence Tools Posted in the Company CP:

- a. Current light and weather data
- b. Current BN CCIR with derived company SIR
- c. Current personnel and vehicle BOLO List
- d. Current SWEAT assessments
- e. Predictive analysis board (predictions both for next 48 hours and for next few weeks posted)
- f. Any relevant products or storyboards from the Battalion S-2

ANNEX C: MISSION TRAINING PLAN FOR COMPANY CP OPERATIONS

Modified from ARTEP 7-10-MTP and ARTEP 17-97F30-MTP

TASKS:

Operate a Company, Battery, or Troop Command Post	Page 1
Conduct Troop Leading Procedures	Page 4
Conduct a Rehearsal	Page 7
Conduct Risk Management	Page 9
Establish Communications	Page 11
Report Tactical Information	Page 13
Conduct Liaison Activities	Page 14

TASK: Operate a Company, Battery, or Troop Command Post

CONDITIONS: The company, battery, or troop is conducting COIN operations independently or as part of a unit of employment or Army forces (ARFOR) or in conjunction with Host Nation forces. The company may be deployed over a wide geographical separation from the BN in an FOB or patrol base. The company headquarters will operate from a fixed location, although the tactical headquarters may deploy into the field. The company may be partnered with Host Nation Army and or Police. The company will be communicating with higher headquarters and subordinate units via a Common Operating Picture. Coalition forces and noncombatants may be present in the operational environment.

TASK STANDARDS: The company operates the CP in accordance with SOP, the order, and or higher commander's guidance. The CP provides communications with higher, subordinate, adjacent, and supporting units; assists the company commander in planning, coordinating, and issuing company OPORDs; and supports continuous operations by the company. The CP maintains situational understanding by receiving, processing, recording, plotting, tracking, and reporting information. The company complies with the ROE.

TASK STEPS AND PERFORMANCE MEASURES GO NO-GO
--

- 1. Company leaders gain and or maintain situational understanding using information that is gathered from FORCE XXI Battle Command Brigade and Below (FBCB2) (if applicable), frequency modulated (FM) communications, maps, intelligence summaries, situation reports (SITREPs), and or other available information sources.
- 2. Establish communications on all available nets:
- a. Higher headquarters command net.
- b. Higher headquarters fires net or operations and intelligence (OI) net.
- c. Company command net.
- d. If equipped, sets or adjusts FBCB2 filters IAW order and SOP.
- e. If equipped, BFT.
- f. If equipped, Satellite Communications (SATCOM), HF FM, and AM radio communications.
- g. If equipped, SIPR connectivity to include VOIP and MIRC Chat.
- h. If equipped, remote video terminal for tactical unmanned aerial system (UAS).
- If equipped, mortar workstation.
- 3. Initiates information management to assist the company's common operating picture (COP) using digital systems and/or analog methods IAW order and/or SOP. Set up the following tools:
- Large AO map with operational graphics and moveable icons
- b. Al maps
- c. SIGACT tracker
- d. Patrol tracker
- e. Personnel number tracker
- f. Forward LOGSTAT tracker
- g. Current Personnel and Vehicle BOLO List
- h. Tribal Overlay
- i. Political Overlay
- j. Key Infrastructure Overlay
- k. Neighborhood Overlays (if required)
- I. Religious Overlay
- m. Enemy SITTEMPs with link diagrams
- n. Pattern Analysis Overlays
- o. Informant Overlay
- p. Intel Cell Predictive Analysis Board (next 48 and next few weeks)
- q. Current SWEAT Assessments
- r. Light and Weather Data
- Battle Captain and RTO conduct duties as per SOP and commander's guidance
- a. Establishes CP log to record critical events, reports received, and actions/locations of higher and adjacent units.
- b. Develops or confirms responsibilities and procedures for integrating analog units and/or dismounted elements into the digital database.
- (1) Updating locations and status of analog and/or dismounted units/elements to digital elements.
- (2) Providing locations of key digital elements to analog and/or dismounted units/elements.
- (3) Providing key information that was digitally transmitted to analog and/or dismounted units/elements.
- c. Manages information flow within company and between higher headquarters and/ or adjacent units.
- (1) Creates and disseminates UAS photos to subordinate units and elements.
- (2) Ensures subordinate units receive reports from higher headquarters, ISR assets, and
- adjacent units.
- (3) Maintains friendly situational awareness (Blue SA). **NOTE**: If digitally equipped, most Blue SA is automatically disseminated to each vehicle equipped to operate on the tactical internet. However, the locations of some friendly elements (e.g., dismounted elements, OPs, or allied vehicles and troops) may not be digitally provided and updated.

SUPPORTING INDIVIDUAL TASKS: None

SUPPORTING COLLECTIVE TASKS: Conduct Troop-leading Procedures (Page 4), Conduct a Rehearsal (Page 7), Conduct Risk Management (Page 9), Establish Communications (Page 11), Report Tactical Information (Page 13), Conduct Liaison Activities (Page 14)

TASK: Conduct Troop-leading Procedures

CONDITIONS: The company, battery, or troop is conducting COIN operations independently or as part of a unit of employment or Army forces (ARFOR) or in conjunction with Host Nation forces. The company has received a warning order (WARNO), operation order (OPORD), or fragmentary order (FRAGO) for an upcoming mission. Time is available to conduct troop-leading procedures (TLP). All necessary personnel and equipment is available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the ROE. Coalition forces and noncombatants may be present in the operational environment.

TASK STANDARDS: The company conducts troop-leading procedures in accordance with (IAW) the SOP and appropriate field manual. All planning, coordination, preparations, rehearsals, inspections, and orders are been conducted.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO	

- 1. Company leaders gain and or maintain situational understanding using information that is gathered from FORCE XXI Battle Command Brigade and Below (FBCB2) (if applicable), frequency modulated (FM) communications, maps, intelligence summaries, situation reports (SITREPs), and or other available information sources.
- Company commander receives an OPORD or FRAGO and issues warning order.
- a. Company commander confirms and clarifies the new mission.
- (1) Participates in a confirmation brief to confirm his understanding of the higher commander's intent and his assigned specific tasks.
- (2) Obtains clarification on aspects of the order from the commander and/or staff.
- (3) Conducts initial coordination with adjacent and supporting units/elements as required.
- b. Issues WARNO
- (1) Company's mission and company commander's time line.
- (2) Enough information for subordinate elements to start preparation for the mission.
- (3) Movement instructions, if movement is to be initiated before OPORD issuance.
- (4) Items not covered in the unit SOP.
- 3. Company commander conducts mission analysis.
- a. Focuses on determining the company's mission and the amount of available time.
- Begins immediately to analyze the mission briefly using the factors of mission, enemy, terrain and weather, troops, time available, and civil considerations (METT-TC).
- (1) Uses no more than one third of available planning time for his planning. (Allows subordinates to have two thirds of available planning time for their planning.)
- (2) Obtains clarification of the higher commander's intent two levels up, specified tasks, and implied tasks, if necessary.
- (3) Coordinates with adjacent, combat support (CS), and combat service support (CSS) elements, as necessary or appropriate.
- (4) Builds enemy EVENTEMP to assist in planning
- (5) Evaluates company status to identify the following as a minimum:
- (a) Supply levels for Classes I, III, V, VIII, and IX.
- (b) Operational readiness of vehicles and equipment to include estimated repair times for nonmission capable items.
- (c) Battery status to include resupply and recharging.
- (d) Shortages in the company unit manning roster (UMR), or in attached units that adversely affect mission accomplishment.
- (e) Communications status (FBCB2, satellite communication [SATCOM], FM, and AM).
- (f) Acceptance of task organization and connectivity within the digital network.
- (g) Company level of collective and individual training and practical experience in similar and related missions.
- (h) Current and anticipated physical condition, to include sleep, and morale of soldiers.
- (i) Additional resources or duty specialties that are required to accomplish the mission.
- (6) Analyzes civilian factors and the rules of engagement to determine their impact on operations.
- (a) Understands the civilian environment:
- 1. Political affiliations and grievances against government agencies and NGOs.
- Ethnicity and factions.
- Cultural distinctions.
- Religious beliefs.
- 5. Attitude toward US forces (friendly, neutral, hostile).
- Needs of the society.
- (b) Identifies the urban infrastructure that supports the inhabitants, the government, and the economy and determines its impact on operations.
- 1. Communications to include wireless, radio, television, and/or newspapers.
- 2. Transportation and distribution to include road network, mass transit, and delivery services that facilitate the movement of supplies, equipment, and people.
- 3. Energy sources and industry that produce, store, and distribute electricity, coal,

SUPPORTING INDIVIDUAL TASKS: None

SUPPORTING COLLECTIVE TASKS: Conduct a Rehearsal (Page 7), Conduct Risk Management (Page 9)

TASK: Conduct a Rehearsal

CONDITIONS: The company, battery, or troop is conducting COIN operations independently or as part of a unit of employment or Army forces (ARFOR) or in conjunction with Host Nation forces. The company has received a warning order (WARNO) and operation order (OPORD) or fragmentary order (FRAGO) for an upcoming mission. Mission planning and coordination for the mission have been accomplished. Time is available to conduct a rehearsal. All necessary personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE). Coalition forces and noncombatants may be present in the operational environment.

TASK STANDARDS: The company conducts a rehearsal prior to the beginning of the upcoming operation in accordance with the order and higher commander's guidance. The rehearsal addresses critical aspects of the operation and provides necessary information for subordinate elements to execute their mission. The company commander reinforces the ROE.

TEPS AND PERFORMANCE MEASURES GO NO-GO
--

- Company leaders gain and or maintain situational understanding using information that is gathered from FORCE XXI Battle Command Brigade and Below (FBCB2), frequency modulated (FM) communications, maps, intelligence summaries, situation reports (SITREPs), and other available information sources.
- Company commander plans and prioritizes the rehearsal schedule.
- a. Selects:
- (1) Type of rehearsal.
- (2) Rehearsal technique.
- (3) Place of rehearsal.
- (4) Attendees.
- (5) Enemy course of action (COA) to be portrayed.
- b. Coordinates liaison officer (LNO) attendance from adjacent units, if required.
- c. Ensures rehearsal time and location are identified in the company OPORD or WARNO.
- 3. Company commander prepares for rehearsal.
- a. Identifies and prioritizes key events to be rehearsed.
- b. Allocates time.
- c. Confirms friendly and enemy situations.
- (1) Receives an updated digital report showing the location of forward and adjacent friendly elements, if applicable.
- (2) Receives an updated enemy situational template for added fratricide prevention and increased force protection, if applicable.
- (3) Clarifies priority intelligence requirement (PIR) requirements.
- (4) Confirms any changes to the company team and company task or purpose.
- (5) Confirms any changes to the scheme of maneuver.
- d. Reviews:
- (1) Completeness of task organization.
- (2) Readiness of personnel and material.
- (3) Level of preparation for the assigned mission.
- e. Disseminates digital reports (if applicable), overlays, and other pertinent information to each platoon to keep them abreast of the situation.
- 4. Platoon (subordinate) leaders complete their planning process.
- 5. Company commander or designated representative executes the rehearsal.
- a. Conducts a formal roll call and ensures necessary equipment is on hand.
- b. Validates task organization for the mission.
- c. Rehearses synchronization of combat power from flank, higher, and his own units.
- d. Synchronizes the timing and contribution of each operating system.
- e. Keeps the rehearsal within established time constraints.
- f. Ensures selected events receive appropriate attention.
- g. Ensures absentees receive changes immediately.
- Bases the execution actions on the enemy COA he selected during the planning process:
- (1) Portrays his best assessment of the enemy COA.
- (2) Communicates the enemy commander's:
- (b) Desired effects.
- (c) Intended end state.
- i. Restates any changes, coordination, or required clarification.
- . Estimates the time that a FRAGO, codifying the changes, will follow.
- k. Orients participants to the training aid and the terrain.
- Defines the standard (what will be accepted as satisfactory performance for the rehearsal).
- m. Visualizes and synchronizes the concept of operations.
- n. Focuses on the key events and synchronization required to achieve the desired effect on the enemy.
- o. Considers the enemy's courses of action (COAs).
- Addresses any points in the operation where the execution of branches or sequels is likely to occur.
- q. Rehearses again, if the standard is not met and time is available.

SUPPORTING INDIVIDUAL TASKS: None
SUPPORTING COLLECTIVE TASKS: None

TASK: Conduct Risk Management

CONDITIONS: The company, battery, or troop is conducting operations as part of a larger force and has received an operation order (OPORD) or fragmentary order (FRAGO) to conduct a specific mission at the location and time specified. All necessary personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE). Coalition forces and noncombatants may be present in the operational environment.

TASK STANDARDS: The company commander conducts risk management in accordance with (IAW) SOP and higher commander's guidance. The company identifies hazards, assesses hazards, develops controls and makes risk decisions, implements controls, and supervises and evaluates controls. The company complies with the ROE.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO

- Company leaders gain and or maintain situational understanding using information that is gathered from FORCE XXI Battle Command Brigade and Below (FBCB2), frequency modulated (FM) communications, maps, intelligence summaries, situation reports (SITREPs), and other available information sources.
- 2. Company commander receives an OPORD or FRAGO and issues warning order (WARNO) to the company using FBCB2, FM, or other tactical means.
- 3. Commander plans using troop leading procedures.
- Begins immediately to analyze the mission briefly using the factors of mission, enemy, terrain and weather, troops, time available, and civil considerations (METT-TC).
- 4. Company commander identifies tactical and accidental risks.
- Ensures mission is executed in the safest possible environment, within mission constraints.
- b. Identifies the hazards associated with all aspects and phases of the mission.
- (1) Integrate as a part of the tactical planning process.
- c. Identifies the benefits of safety measures to the unit's mission versus the potential cost of risk or safety hazards paying particular attention to METTTC factors.
- d. Conducts continuous assessment during the operation for risk reduction.
- Company commander assess identified risk or safety hazards.
- a. Determines risk that can be eliminated or avoided.
- Assess the severity of hazards that cannot be eliminated or avoided.
- c. Compares identified risk to the higher commander's acceptable risk level based on stated mission objectives.
- d. Describes operations in terms of its risk level (extremely high, high, medium, low) based upon the factors of METT-TC.
- e. Computes overall risk status.
- f. Identifies aspects of the operation that may be affected by the primary causes of fratricide.
- (1) Failures in the direct and indirect fire control plan.
- (2) Land navigation failures.
- (3) Failures in combat identification.
- (4) Inadequate control measures.
- (5) Failures in reporting and communications.
- (6) Weapons control status.
- (7) Battlefield hazards.
- (8) Adjacent units.
- Commander develops controls and makes risk decisions to eliminate or reduce risk and safety hazards.

Note: Only the commander can make final risk decisions. He alone decides if controls are sufficient and acceptable and whether to accept the resulting residual risk.

- Selects course of action (COA) that achieves the commander's intent and minimizes the risk.
- b. Develops procedures that reduce risk.
- Develops controls that specify who, what, where, when, why, and how each control will be used.
- d. Integrates controls into rehearsals and mission executions.
- 7. Company personnel implements risk control procedures.
- 8. Commander supervises and evaluates risk management controls.
- Supervises mission rehearsals and execution to ensure combat safety standards are maintained.
- Evaluates the effectiveness of controls and adjust as necessary.

SUPPORTING COLLECTIVE TASKS: None

TASK: Establish Communications

CONDITIONS: The company, battery, or troop is conducting COIN operations independently or as part of a unit of employment or Army forces (ARFOR) or in conjunction with Host Nation forces. The company may be deployed over a wide geographical separation from the BN in an FOB or patrol base. The company headquarters will operate from a fixed location, although the tactical headquarters may deploy into the field. The company may be partnered with Host Nation Army and or Police. The company will be communicating with higher headquarters and subordinate units via a Common Operating Picture. Coalition forces and noncombatants may be present in the operational environment. All necessary personnel and equipment are available. The signal annex to the operation order (OPORD) is available.

TASK STANDARDS: The company establishes communications in accordance with (IAW) the SOP, order and higher commander's guidance. The company prepares communication systems for operation. The company establishes and enters appropriate communication nets. The company maintains communications and communications security.

TASK STEPS AND PERFORMANCE MEASURES GO NO-GO
--

Note: Commanders, of digitized units, should NOT rely on digital communications alone. Digitization does NOT eliminate the requirement for maps and frequency modulation (FM) communications. The decision to use FM versus FBCB2 depends on the situation and standing operating procedures (SOP).

- 1. Company leaders gain and or maintain situational understanding using information that is gathered from FORCE XXI Battle Command Brigade and Below (FBCB2), frequency modulated (FM) communications, maps, intelligence summaries, situation reports (SITREPs), and other available information sources.
- 2. Company commander and or first sergeant locate radio stations (primary and alternate) some distance from the company headquarters or command post.
- a. Allow for effective use of terrain in an electronic warfare environment.
- b. Avoid frequency interference from power lines and other friendly sources.
- c. Provide physical security from attack.
- d. Provide the best possible cover and concealment consistent with reliable transmission and reception of required stations.
- 3. Company prepares the communication systems for operation.
- Ensures that digital equipment is initialized and operating IAW SOP and applicable manuals.
- b. Installs required antenna.
- c. Sets assigned frequency(s).
- d. Makes required settings.
- e. Programs equipment for secure operations using key list or appropriate keying devices, if applicable.
- f. Checks all system components for operational abilities.
- g. Provides security for communications security (COMSEC) items.
- Company operates the company net control station (NCS) using FBCB2, wire, or radio.
- a. Opens analog and digital nets in accordance with (IAW) current Signal Operating Instructions (SOI)/Signal Supplemental Instructions (SSI).
- b. Challenges all analog and digital stations in net as required by the SOI and or SSI.
- c. Controls entry and departure of all stations.
- d. Monitors the net for operability and connectivity of digital devices, if applicable.
- e. Reports loss and or operating difficulties of any analog or digital station to the chain of command and higher HQ communications element.
- f. Enforces station and net restrictions.
- g. Monitors the net to detect errors in operating procedures.
- h. Corrects all errors in net operating procedures.
- i. Enforces station listening silence as prescribed by or commander's directive.
- j. Completes transition to extend range of radio station within 15 minutes, if required.
- k. Remotes radio station at least one kilometer, if required.
- Directs change to alternate frequency when compromise of primary frequency is suspected.
- m. Closes net IAW the SOI/SSI.
- 5. Company enters higher headquarters and fire support nets as required.
- Company transmits and receives messages over FBCB2 and radio nets using the correct format and procedures.
- a. Processes messages by precedence, date/time group, and IAW the tactical standing operating instructions (TSOP).
- b. Processes incoming messages without errors.
- c. Forwards incoming messages to appropriate element/section.
- d. Check outgoing messages for completeness and readability.
- e. Employ approved radiotelephone procedures.
- f. Transmit messages IAW precedence, correct format, and prescribed text.
- g. Employ approved codes and brevity lists when transmitting the names of persons, places, and sensitive information.

SUPPORTING INDIVIDUAL TASKS: Communicate on a Tactical Radio (STP 21-II-MQS), Determine Call Signs, Frequencies, and Item Numbers (STP 21-II-MQS), Use an Automated Signal Operation Instruction (STP 21-24-SMCT)

SUPPORTING COLLECTIVE TASKS: None

TASK: Report Tactical Information

CONDITIONS: The company, battery, or troop is conducting COIN operations independently or as part of a unit of employment or Army forces (ARFOR) or in conjunction with Host Nation forces. The company is required to report tactical information, such as priority intelligence requirements (PIR) or company status. All necessary personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. Coalition forces and noncombatants may be present in the operational environment.

TASK STANDARDS: The company reports tactical information in accordance with (IAW) SOP, the order, and higher commander's guidance. The company reports tactical information using secure means and the proper format.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
1. Company leaders gain and or maintain situational understanding using information that is gathered from FORCE XXI Battle Command - Brigade and Below (FBCB2) (if applicable), frequency modulated (FM) communications, maps, intelligence summaries, situation reports (SITREPs), and or other available information sources.		
2. Initial reporting within 15 min. (CCIR.) Complete or provide more detailed reporting in 2 hrs.		
Company commander or designated representative submits digital reports. Uses correct preformatted standard reports.		
 4. Company commander submits reports using FM or other tactical means. a. Consolidates and submits spot reports to higher. b. Reports using the most secure means available. c. Submits a situation report (SITREP) or other command required report in accordance with (IAW) the operation order (OPORD), the SOP, guidance from higher. 		
e. Forwards reports using no more than two transmissions.		
5. Company updates reports as the situation changes.		

SUPPORTING INDIVIDUAL TASKS: None

SUPPORTING COLLECTIVE TASKS: Establish Communications

TASK: Conduct Liaison Activities

CONDITIONS: The company, battery, or troop is conducting COIN operations independently or as part of a unit of employment or Army forces (ARFOR) or in conjunction with Host Nation forces. During tactical operations the company is directed to conduct liaison within its area of operations (AO). Information exchange, coordination, and/or negotiation is required with military, government organizations, nongovernmental organizations (NGOs), and other civilian factions within the AO. The unit has digital connectivity with the higher headquarters via Force XXI Battle Command Brigade and Below (FBCB2). The international media are also present in the area. ROE have been published. Interpreters are available and a civil affairs (CA) element may be attached or operating within the company's AO. Additional maneuver, combat support (CS), and/or combat service support (CSS) assets may be available to the company.

TASK STANDARDS: The commander determined the liaison requirements within his AO to ensure mutual understanding and to promote the process of conciliation. Liaison was conducted at the lowest level possible and did not exceed the applicable level of authority. The commander tasked subordinate leaders to establish and maintain liaison and personally conducted liaison when the situation warranted his attention. Dispute resolutions were followed by scheduled preventive actions and follow-up liaison. The

command post (CP) maintained situational awareness and contact with liaison elements by monitoring FBCB2 displays and/or FM communications to receive, assess, and report information to the commander, subordinate elements, adjacent units, and/or the higher headquarters. Information and reports were transmitted to all elements using the communications systems that allowed the timeliest decisions by the commander and his higher headquarters. All operations complied with the ROE.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
-------------------------------------	----	-------

- 1. Commander determines liaison objectives and requirements that may include but are not limited to—
- a. Coordinates with higher-level intelligence, surveillance, and reconnaissance (ISR) sources and local military contacts to obtain regional information.
- b. Identifies civilian liaison requirements through coordination with civilian authorities, religious leaders, ethnic groups, factions, and NGOs operating within the AO.
- c. Identifies information required from other military organizations, governmental agencies, and NGOs.
- d. Identifies information required by other military organizations, governmental agencies, and NGOs.
- e. Coordinates with regional civilian and law enforcement officials to obtain information on
- paramilitary forces, belligerent factions, and/or criminal organizations operating within the AO.
- f. (D) Assesses the civilian situation to include as applicable—
- (1) Locations of government and NGO headquarters.
- (2) Composition and dispositions of regional (state) and local military and/or law enforcement organizations.
- (3) After-action review (AAR) documentation from previous liaison with government, NGOs, and military and/or law enforcement organizations.
- (4) Factions, key leaders, locations, compositions, and dispositions of known friendly, neutral, and belligerents.
- (5) Description of uniforms, vehicles, insignia, markings, and equipment to include weapons.
- (6) Current locations of weapons holding areas, staging areas, and/or encampments.
- (7) Locations of police stations, food distribution points, and power generation/ transformer facilities.
- (8) Locations of media outlets and communications networks.
- (9) Influence of noncombatants on operations (both friendly and enemy/threat).
- (a) Political affiliations and grievances.
- b) Ethnicity, religious beliefs, and cultural distinctions.
- c) Known belligerents and other organized factions.
- (d) Living conditions that affect and separate factions.
- e) Attitude toward US forces and their recent activities.
- g. Assesses impact of terrain to include—
- (1) Effects on fields of fire and stand-off ranges of weapon systems.
- (2) Effects on use of tactical unmanned aerial vehicles (UAS) and other aviation assets
- for reconnaissance, transportation, resupply, and fire support.
- (3) Use of rooftops for observation, ambushes, and other actions against forces.
- (4) Basements and subterranean systems for cover, concealment, infiltration, and sustainment activities.
- (5) General composition of the buildings and road surfaces.
- h. Develops liaison requirements and contact frequency with local officials, agencies, and/or organizations within the AO.
- Establishes times and locations for initial liaison contacts with local officials, agencies, and/or organizations.
- 2. Commander issues order addressing the following:
- a. Orientation to include, as necessary, key installations and facilities; transportation network; subterranean avenues, entrances, and exits; checkpoints and/or roadblocks; and the time/distance factors for reaction times.
- b. Civilian situation to include as applicable—
- (1) Locations of government and NGO headquarters.
- (2) Composition and dispositions of regional (state) and local military and/or law enforcement organizations.
- (3) AAR documentation from previous liaison with government, NGOs, and military and/or law enforcement organizations.
- (4) Factions, key leaders, locations, compositions, and dispositions of known friendly, neutrals, and belligerents.
- (a) Recent trends in local public opinion.
- (b) Intensity levels of past and/or current disturbances.

Annex C (MTP) to 2 BCT, 101st ABN DIV (AASLT), Company, Battery, and Troop CP Operations SOP

SUPPORTING INDIVIDUAL TASKS: None

SUPPORTING COLLECTIVE TASKS: None

ANNEX D: BCT TARGETING METHODOLOGY

- 1. All company operations are part of the BCT overall targeting process. All operations achieve one or more of the following:
 - Deliver lethal and/or nonlethal effects
 - Make assessments
 - Gather intelligence
- 2. The BCT targeting process begins with assessments and intelligence gathering at the company, platoon, and squad level. Intelligence and assessments are fed into the process through reporting to battalion headquarters and through systems such as TIGR, Access PRO, or other database software. Companies also conduct their own analysis of information and intelligence to nominate targets to battalion or request assets to support the company engagement of a target.
- 3. Battalions will analyze assessments of all their companies as well as the target nominations and requests for resources. If the battalion has assets available to allocate to company targets, the battalion issues a FRAGO allocating the resources to support company targeting. If the battalion does not have the resources, the nomination/request is forwarded to BCT along with assessments of the battalion area.
- The BCT staff uses information gathered by the companies to feed various working groups in order to recommend to the BCT commander methods to synchronize efforts across the BCT and to allocate resources.
- 5. The BCT targeting method is based on a seven day cycle, but information provided by a company operation can enter the process <u>at any time</u> during the cycle. The result of the BCT staff targeting meeting process is a decision by the BCT commander approving targets and allocating resources.
- 6. The BCT will then issue a FRAGO allocating resources and tasking battalions to accomplish tasks to deliver lethal or nonlethal effects on a target, as well as gather intelligence and refine assessments.
- 7. Battalions then mirror the BCT staff actions by allocating resources to the companies to accomplish tasks to deliver lethal or nonlethal effects on a target, as well as gather intelligence and refine assessments.
- 8. Targets are engaged using the Strike Forms of Contact:

Direct Contact Indirect Contact

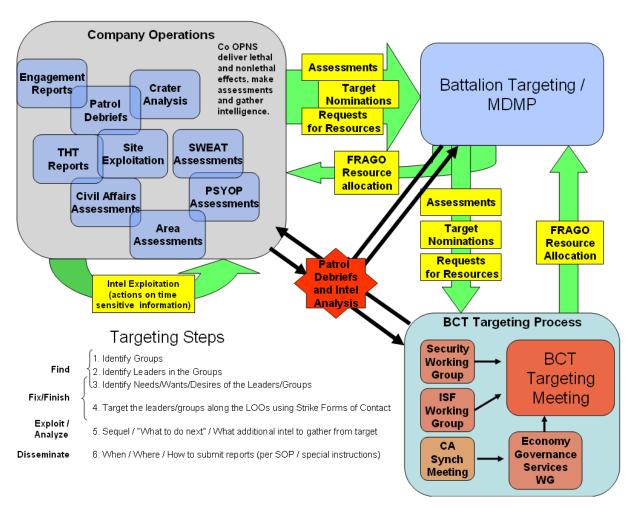

(he can feel our presence) (he does not feel our presence)

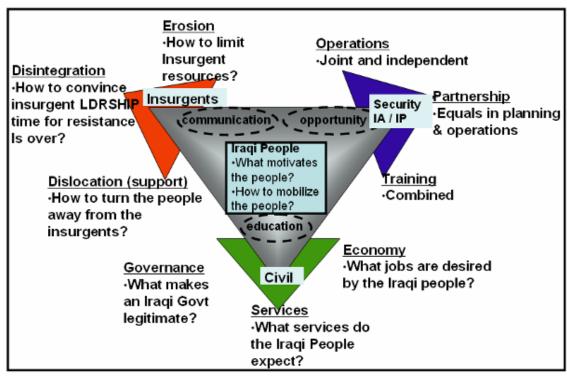

Direct Fire UAS - visual Indirect Fire SIGINT Detain HUMINT Patrol ELINT Print Media IMINT

TV/Radio MASINT (JSTARS)
Face to face PSYOP / Rumor

Telephone CMO Project

- 9. For time sensitive targets, companies must quickly exploit intelligence at their level, pursuing targets until achieving the desired effect (influence/capture/kill).
- 10. This cycle is continuous throughout all operations with assessments and intelligence gathering beginning at the company and Strike Forms of Contact executed by the company.
