

milSuite SPOTLIGHT

The Army's Office of Business Transformation has found milSuite to be the **premiere site collaboration tool** available within the Department of Defense.

We use it extensively to assist in **governance, training, working groups, and senior management** of the Army's business operations.

LTG Thomas Spoehr - Director, U.S. Army Office of Business Transformation

KMNet has given the proponent the opportunity to **inform and collaborate** not only **throughout the Army** but **across the Joint footprint**. The ability to exchange ideas, concepts, doctrine and TTP's with knowledge workers across the Force has **increased organizational performance at every level of the Army**.

LTC Drew Fletcher - Director, U.S. Army Knowledge Management Proponent, U.S. Army Combined Arms Center

MONTHLY SAVINGS

"ARNG G1 leveraged milSuite to improve efficiencies and **save more than 150 person-hours and hundreds of emails monthly** by placing 4 weekly reports and all State Visit information in milBook projects. Subject matter experts update the information directly, Division and G1 operations officers are no longer involved in data collection and consolidation through email attachments, and **senior leaders can see at a glance what has been updated and when.**"

Allan Schreck
Strategic Planning Specialist
Army National Guard

TRAINING SCENARIO

"USAREC uses the Training Scenario feature and we love it. We build progressive scenarios that each commander and their senior enlisted advisor has to engage quarterly. This is a **great leader development capability** with boundless possibilities."

Rick Welling
Chief Doctrine Division
U.S. Army Recruiting Command

CROWD SOURCING

"[We're] crowd sourcing to discover, locate, and obtain SOPs and Best Practices that were previously only available within a small, local community of practice that was outside of our command. Crowd sourcing from milSuite participants afforded CAC G1 and all supervisors to **discover techniques and solutions not documented** in the Electronic Evaluation System (EES) user guide."

LTC Guy Buice
Chief Knowledge Officer
Combined Arms Center

Did you know?

On average, milSuite gains 16,000 new users per month

Did you know?

65% of milSuite users are Active Duty Military or National Guard / Reserves

NEW MILSUITE HOMEPAGE

The new homepage provides improved visibility with a new global header and quick access to bookmarks, your account page, training & support, milSuite Playbooks and milSuite X. It is also mobile ready!

MILBOOK 6.0 RELEASE

This new release brought new features like a Streams page - to showcase custom and global Streams like Bloggers on milBook, Your View, more Tiles to display useful info, Place pages, follow a tag, and more all in a mobile ready package.

LAUNCH OF MILADVISOR

An idea stemming from milSuite X, milAdvisor is a TripAdvisor inspired application, focused on info related to planning & executing different military operations and training at bases across the globe.

WHAT'S NEW ON milSuite

MILSUITE ANALYTICS

New analytics capability provides real-time user stats and uses widgets to create reporting dashboards for the milSuite team. Additional reports provide exportable data/metrics, visitor logs/actions and engagement metrics with online contextual help.

MILSUITE DIRECTORY

Enhancements were made to the milSuite directory for user auto-registration, dynamic updates to accounts on login, smart time-out session warnings, and weekly account updates for the latest profile data from milConnect.

MILSUITE ACCOUNT PAGE

New easy-to-access milSuite Account Page for users to quickly update their profile data in real-time and view others across milSuite.

FUTURE ROADMAP

1

SHAREPOINT CONNECTOR

Will allow milSuite integration and access to content on complementary SharePoint sites, like DEPS and AES

2

SURVEY TOOL

Lightweight survey capabilities to complement existing polling features

3

MILUNIVERSITY

Expansion of milUniversity adding greater functionality

4

CLOUD MIGRATION

Preparation for potential FY18 cloud migration to leverage approved cloud hosting environments
